SAGAR PARASRI'S GOD-ORDAINED PEACE MISSION "NO WAR NEVER WAR"

God uses different situations in the lives of his people to achieve his purposes. In spite of our different circumstances, we are all equal in the sight of God our Creator, and He can use us all in a big way if only we submit to Him and do his will. Brother Sagar Parasri is one good example of a person who, in his physically challenged situation notwithstanding, has allowed God to mould him and use him as his Ambassador to spread the good news of peace and love to the world.

In his book "No War Never War" brother Parasri has, to the glory of God, used his God-given time, energy, talent, mind, knowledge and his whole being to raise the consciousness of humankind on the need for peace and avoiding conflict. His message is loud and clear - that we all have a stake in building and maintaining peace in the world. Every small act of humility, love and kindness, and every smile extended towards a fellow human being, indeed, every act of forgiveness, goes a long way in contributing to peace wherever we are.

Brother Parasri is a true advocate of the peace we all need - the peace that comes from God which we should all embrace through the guidance of the Holy Spirit living in us. We will all do our part to pass on the message of peace in this book wherever we are and to whomsoever we can, and let there be peace and love in our one world. May our sovereign Lord enable as many people in the world to access and read this book "No War Never War."

NO WAR NEVER WAR

WORLD LOVES PEACE

*Aroma is glowing around you
Greenness is standing erect around you
Fresh water is flowing to give life around you
Over all there is hanging pretty sky.
Just open your eyes
Just ponder over these facts
And go through this remarkable world
The best way to take,
To lead life without conflict
To run the world smoothly,
And having always favourable thoughts
Doing always favourable jobs.
Just unfolding your peaceful umbrella
And walking ever on peaceful paths.
Let us give strenght to peace only.
With might and main to kick out terrorism
And vanish them from this Universal
For the sake of the World peace,
Come, come joining hands
Come, come standing get-together
To hoist the flag of peace across the world*

TO WHOMSOEVER IT
MAY CONCERN

Dear Sir,

Besides being a hard core Fighter Pilot and a distinguished war veteran, I can imagine the gigantic task this young charismatic, Sagar Parasani has taken upon himself despite his physical disability.

Conflict in mankind can be traced to pre-historic days and now there are very powerful and influential lobbies working in the world to promote their trade which runs counter to peace in today's environment. Preaching Peace and No War is like leveling the Himalayas. Despite all odds against him, I support him to the hilt for this noble cause for mankind and wish him all success.

MESSAGE

In the very first meeting with Shri Sagar Para Shri, I was very much impressed by his multi-faceted personality. In spite of his disability, his fighting spirit and vision for a peaceful earth is unbelievable. The physical disability has in no way deterred him from his path seeking peace. After going through this book on world peace, my perception of this great personality has grown more. He has a very broad vision for a peaceful and harmonious world. Practically no aspect of the problems and the solutions regarding world peace has been left untouched by him in this masterpiece. I am sure that the readers of this book would agree with my opinion. I sincerely hope that the book reaches a very large audience and wish to see more such contribution from him.

*“Disability is not a brave struggle or ‘courage
in the face of adversity’.
Disability is an art. It’s an ingenious way to live.”*

This spirit is truly lived by a man known as SAGAR PARASRI. A man of grit & courage, strong will power and patience, his physical disability has in no way deterred him from his path seeking peace. His book on peace is a benchmark. His vision of peaceful & harmonious world is exemplary.

It was a real pleasure to meet SAGAR PARASRI. I admire him for his sense of purpose, sincerity & unrelenting spirit for the cause of ‘peace & harmony’. He, himself, is a live example of peace & tolerance.

His book “DISCOVERY OF PEACE” highlights every topic of hatred and provides concrete suggestions, that will help in the quest for peace. Our school follows the motto of ‘Vasudhaiv Kutumbkam’ but Sagar truly lives the spirit of ‘Vasudhaiv Kutumbkam.’

I would like to wish him the very best and success in all his endeavours.

To Whom It May Concern

It is indeed a pleasure to speak about Mr. Sagar Parasri who is working on World Peace mission. He is serving in the institute of Education, National Council of Educational Research and Training, New Delhi. Mr. Parasri has proved his capabilities by participating in several National and International conferences and meetings to spread the message of peace.

Mr. Parasri is such a committee person that his physical state has never halted his sustained endeavor to accomplish the task. This makes his personality unique and he deserve worth appreciation. He must be suitably awarded to uphold motivation in the society for such a higher moral concern which he is relentlessly pursuing.

I wish him grand success for his mission.

NO WAR NEVER WAR

6.5.2011

It was a real pleasure to meet Mr. Sagar Parasri at “Shilpotsav” a festival of crafts organized by the Ministry of Social Justice & Empowerment, Government of India.

I specially admired the sense of purpose, sincerely and an unrelenting spirit for the cause he has undertaken and his cause is something that concerns us all - The cause of ‘Peace’ and No War. We all think about it, we all want to do something about it, but here is a person who thinks, breaths and lives this cause. He writes about it, talks about it and lives it every moment of his life, his quest for peace and no war.

I would like to wish his book and his work great strength and energy and hope he can take it to its rightful end.

I would like to recommend his book ‘No War Never War’ and also recommend many of his suggestions, that will help in the quest for peace.

I would like to wish him the very best and success in all his endeavours.

"Go ye therefore, and teach all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Ghost." Mt. 28:19

Emmanuel Believers' Fellowship

JAISALMER- 345001 (Rajasthan)

Ref. No.

Date 25 July 2011

Around two years back I met a great personality on a wheel chair, Mr. Sagar Parasri with a mission of peace, who was travelling from city to city to convey the people regarding peace and no war.

"Peace be with you" was the words uttered by Lord Jesus Christ to His disciples just after His resurrection. It seems that Mr. Parasri is carrying out the message of Lord Jesus. It is commendable to see "someone" striving so hard to spread the message of peace when the present world is crying out for "Little peace."

I recommend the book NO WAR NEVER WAR which is the vision of Mr. Parasri to be published and my prayer is that his vision may travel beyond the boundaries of lands and may convert wars and rumors of wars into peacefulness.

Lord Jesus said "Blessed are the peacemakers for they shall be called the sons of God." - Matt 5:9

May the Almighty God give him strength to succeed in all his attempts.

03rd March 2008

To Whom It May Concern :

Recommendation Letter for SAARC Award – 2007

I am pleased to commend on the notable works on the area of World, Peace being carried out by **Mr. Sagar Parasri**, S/o Late Dr. Vishnu Dutt Sharma, R/o 3/34, NIE Campus, NCER, Sri Aurovindo Marg, New Delhi – 110 016.

I first met Mr. Sagar Parasri on August 11th 2006 along with his world peace delegation that visited the Sri Lanka High Commission on a world peace promotion mission. Since then I had been observing his world peace endeavors and closely associated with some of his projects where he was successful in bringing people and children of different faiths and status together to hail world peace. Quite recently he visited Sri Lanka as a part of his world peace promotion activities and had interactions with persons of various walk there.

Mr. Sagar Parasri has written several poems on the theme of world peace and harmony which have been highly read and admired by several leaders and high dignitaries. He has also authored a book captioned 'Discovery of Peace' in which he notes 'Impediments do not bind those who are determined to go forward; Obstructions do not stop those who fend beyond hopeless circumstances'. In fact, Mr. Sagar Parasri is a physically challenged person, the condition which resulted from a childhood accident. This did not deter him from initiating a noble mission such as achieving world peace through participation of people. As a peace researcher, he had formed the 'World Wide Peace Organization' in 1998 and successfully enrolled over 80,000 peace envoys.

Mr. Sagar Parasri is an inspiration to millions of youths worldwide and his determination to contribute in achieving world peace one day would take him to the highest destiny. I strongly believe that he deserves SAARC AWARD – 2007 for his active contribution to the world peace which also would encourage him further.

Sincerely,

A. Sabarullah Khan

NO WAR NEVER WAR

Preface

Sagar Parasri is a man inspired by his dream of world peace. He never fails to spread his ideas amongst those he interacts with. Let not his frail body deceive you into thinking he can not fight the battle for peace. In spite of having 90% Locomotor Disability he manages to convince those around him to take up cudgels for the cause.

In his book he goes to great lengths to analyse the reasons for disharmony in the world. His words flow with emotion from his heart. He wants to incite people to care about the planet we all live on. He looks into the harsh reality of the damage we are doing to the environment. Violence and hatred have destroyed civilizations by overthrowing each other - Sagar speaks of No War Never War.

Sagar has stressed on the need for peace education in all classes as a compulsory subject. He fears, as most of us do the advent of the III World war.

He has put his all, his soul into this struggle. Will you join him?

NO WAR NEVER WAR

My observations on "No War Never War"

Prof. Poonam

The book titled "No War Never War" written by Shri Sagar Parasiri is another commendable effort by Shri Sagar to enlighten and awaken people towards peace - peace in the world, on the planet earth. He very innovatively expressed that our duty of humanity is to save all living beings on the earth. The book has been written in a simple manner, yet provokes thoughts and succeeds to somewhere prick the conscience. He writes "The way forest are decreasing the world over, greenery i.e. natural happiness is also being swept away from us". When the author equates the greenery with happiness, it does seem to be very natural and true. He further writes "The good education can change insane to a human ..." which is indeed true. His simple way of expression e.g. "... have you ever thought about those thousands of children who do not know about education, about school ... under the open roof of sky, these children are just creeping towards their end"; also that "Life is moving towards dark from the light of happiness", are capable of touching heart. He also writes that with the help of small and true incidents, we can teach children about the positive ideology and language of kindness. This is how peace education should be given to the children which will help the children enjoy education rather than taking it as a burden. As they develop kindness towards animals, birds, etc., they will be influenced with the charm of earth and promise to save it as a strong desire in life. The author goes on to describe the traumas of the war, disease and terrorism and advocates the cause of peace on the earth. He writes darker nights are twinkled with twinkling stars and this is a message for people to

NO WAR NEVER WAR

be happy in their tough time. Life is given not only for our own self but for the welfare of others. Here the author includes birds, animals, plants and the whole planet earth among others. This is the ideology for love and peace.

The book is worth reading, the author also makes suggestions towards world peace, which are capable of seeking attention and consideration. I congratulate him for having written this book and wish him all the best. I hope and wish that the world peace does prevail over terrorism, unrest, war and various other forms of conflicts which destroy the elements of humanity, love and peace.

NO WAR NEVER WAR

PEACE Vs WAR

*No doubt between peace and war
Fight has been on for a long time
Means between rich and poor thoughts,
No doubt both peace and war
Are emerging from one's mind.
Anti-human beings activities.
Like Hiroshima and Nagasaki's annihilation scene,
Like First World War from 1914 to 1918.
Rich thoughts mean
Always fruitful results in favor of humanbeings.
Like 1688 bloodless revolution in England,
Like reunification between East and West Germany.
Hence, peace wishes ever smile at everyone's face
And loves to promote C.T.B.T. policy
With great expectation,
One day this globe must be nuclear bomb-free
No doubt peace is preventing any situation
From going bad to worse.
Like Jerusalem or Kashmir's tangle
In this process, let us not forget our peace-envoy
Like Mahatma Gandhi, Sri Aurobindo, Mother Teresa etc.
Yes under peace banner,
No doubt their dreams come true soon.
At first and at last
Peace is winner in every corner
The world commitment to peace not at all war.*

TRUTH ABOUT THE GLOBE

To recognize the truth of life and to realize the truth of earth we have to brace all those facts which are helping in recurring human life. Because on this Earth Human life is the only thing which is incredible. They have to know about others to save all living beings of the earth. These are related to discussion about important subjects and by doing this we are doing our duty of 'Humanity' for being blessed with life on this earth. We will save such and every subject of and on earth so that the incredibility of earth in the solar system could be kept alive. Earth is the only planet where life and greenery, birds and animals and beauty is seen. Here only we have the pleasant sights of morning and evening and it's not possible on any other planet. Birds flying in the sky come with a spring of colours. The splendor of clouds is beyond imagination when it sprinkles rain-drops on earth increasing its beauty and blooming gardens, farms, orchards and greenery. Only because of this life on earth for billion creatures has been possible and neutralized. And we Human-beings have not been a protector instead we've been destroying it. What type of justice is this? We are not able to sustain our large, beautiful and sweet our 'Earth'. This inability can put life in danger, on this planet for all living-beings and turn the earth into a barren.

Leaders of the World: How many initiations we are taking for the true love of human being is it true or false?

The planet earth which rotates around the sun with the speed of 1.7400 lakh km/hr, can we ever imagine the same speed by us sitting in a rocket which is 14/95/97/ 900 km for from the sun. The rays of the sun take a time of nearly 8 minutes to reach the earth. Diameter of earth is 13,92,520 km and the surface is nearly 511 million KM. The beautiful planet earth has its near-about 71.8% area full-filled with water. Rest every part of it is covered by human-life except some snowy areas. Population on this earth is more than five billion. Most important question is how much space is enough for this number of people to live? Through some new statistics we've come to know that only area on earth is engaged by human being. Rest part of earth has big mountains, deserts, forests, rivers, lakes, farms, gardens, orchards, agricultural lands and deserted barren lands like Rajasthan in India. Earth is divided into seven great continents and seven great oceans.

In these seven great continents there are altogether 206 countries residing. And due to many reasons like poverty corruption, unemployment, illiteracy, theft, robbery, quarrels, terrorism, enmity, differences between religism and casteism there is a huge calamity shadowing on the earth. To survive human life needs only the fundamental basics:- food, clothes and shelter. It's the only necessity to live as well as a human right. It's believed that the earth was formed about six crore years ago i.e. here progress has taken place slowly. Although we don't even have proper statistics. The ancient information collected is also partially an imagination about it. Because the truth of life and earth have a big difference. Perhaps we have a cent percent information about that. Before human-life there were only wild animals and creatures creeping on earth. At last Almighty God Created a change and the earth changed. What did God think when be

created human beings on earth? He gave them the power of consideration. He also gifted them voice so that he could power his heart out for others. Almighty God gifted human-beings everything to live life. But human-beings did not bother to value the truth of life. And yet we've not taken the path of truth and are still chasing on unknown path for the welfare of an unknown's sake. To fulfill our personal interest we've always been selfish. This narrow thoughts has always brought difference on the earth right from the beginning itself. That is the reason we are not able to do anything better. We've been prefacing all the evil things. But somewhere there are some people who have realized that we've been on a wrong path and their guilt have given birth to the vibes of unity, brotherhood, peace and love probably. So that we may save our beautiful earth like a good soldier.

***PEACE BE
WITH
YOU***

NO WAR NEVER WAR

IMBALANCE IN ENVIRONMENT

Siberia the coldest region of earth and Namibia the one with the hottest climate, the deadly desert always trapped with sultry heat are perturbed. On one hand we've got a falling Temperature and on the other we have the rising one these both having a variation in colours. Scientists are worried due to the major changes in the environments. They have been warning us against the danger ahead. Because those regions of earth having winter for the whole year can create unfortunate incidents beyond imagination. One of the examples of these incidents its is the great continent of Europe being affected by terrible floods. Huge glaciers melting down are bringing lot of changes. Although changes keep on coming but in minor forms. But major changes are a subject of bothration. Oxygen present on the planet earth is only upto 3km in height are little more, and is helping all living-beings live with their identity, spread over on area of 21%. In the environment most of the space is filled with CO₂.

It's been believed that the wildest and poisonous animal even do not attack until and unless they're been teased, but we humans sometimes knowingly and sometimes unknowingly are destroying our environment slowly but sharply, just to win on one.

We can survive under the banner of World Peace.

To prove themselves a rich and best one. I don't know from when, why and for whom humanity is masked by insanity and hunting the natural beauty to ruin it. In the world how many rich people are praised and how many poor are provided kindness. After all whose the on lighting the spark of destruction? Who is gesturing behind the blind waste of billions of dollars? And its not a matter of one or two everyday, million of dollars are misused, by making fatal weapons. Do we ever give a second thought on for whom are we wasting so much of money? For who's benefit? We prepare the best war-ships, fighter air-crafts, fatal atom bombs etc. God owns are filled with arm and weapons. So much of money is wasted on these and far away at the other side green forests with innocent animals, helpless humans longing for one time food and perturbed for happiness innocently and answering of the destruction chasing them.

Then for whom do we challenge to be protected? Request for a balance to be maintained in the environment. This imbalance is a result of our own narrow thinking. But to do justice with our people and planet there is an un known power lying in the world of our oceans. Where the most common and world wide known creature in the form of tasty sea food also are the fishes. There are many sub-marines found here all the detective ones hunting for an unknown enemy. On the sea-surface so many huge sea-ships sailing with weapons loaded sticking to certain point sometimes to prepare for a counter back attack.

Human life needs pure drinking water which is on a shortage. Humans surviving for life are able to get only 1% out of their need. Huge population fighting day and night with many deadly epidemics like hunger, unemployment, poverty, dreadful diseases etc. But this truth is unseen by bigger countries and by doing so they are snatching the rights of small countries and this is a gross injustice. An act beyond imagination.

All of the rivers finally go to merge themselves in the oceans. They feed peoples, animals etc thirst and loose their identity in the ocean. But do not loose their goodness. Human civilization developed and was possible only with the helps of hundreds of rivers. These rivers helped humans inhabit in the world and more ahead. And now we have polluted them. Their beauty has been vanished and their water is turned poisonous, people surviving on that water have lost their life are writhed ! Who is the culprit of this? Honest people living around or the wastage thrown in the drains. Poisonous garbage and faces has polluted major water sources even, due to which all living creatures life is trapped in a great danger. This is the sin of human-beings coming against them instead of protecting the natural treasure they have been destroying it. Before time ends we need to win on all our bad habits with good ones enforced to have a control on the worsening situation of land and water plus to save them. The truth of water being our life is being lied by human-beings and they've been selfish and spreading it in the environment. Alas! we could have learnt practically that water is holy and nature belongs to us and had took care of them like our own child! Nursed them and saved them. There would have been a very charming face of earth. Where has the rainbow disappeared? Which

Need pollutionless environment with growing employment for the poor.

we used to look at our childhood during the rainee season. The pure food with a delicious taste. During those days no external effort like urea was needed for agriculture. And today for agriculture and farming we are compelled to used various types of external efforts like urea and chemicals. Due to this we have been suffering from many type of diseases also. Although caring and nursing has been more convenient and effective today but the diseases also are comparatively increased to the ancient times. We are craving to keep our body fit and have true food. We show off only the outer ostentation and keep in taking multivitamins, for the sake of being fit. There are numerous hospitals in the world but the crowd there tells us that people are more sick today. People are compelled to depend an medicines for life. Many times we've heard about rain-drops falling with many harmful chemicals. This is a straight forward result of a defect in the environment. Many forests of the world have been deforested and turned to a barren land. The way forests are decreasing from the world, greenery i.e. natural happiness is also being swept away from us. This is our history and identity today. And not only this by deforestation we destroyed forest creatures also, only for our sake. We are so mean that for our sake we are ready to destroy our planet also.

Due to deforestation we've lost forest animals also. And those homeless creatures have started disappearing from the world's face also. Among this the most powerful and strong wild creature tiger has also started disappearing. The one and only reason behind this is we humans. Because by deforestation we have snatched their shelter and made all of them homeless and get disappeared. 'Life' is a right for human and animal both. Almighty God has given s brains to think and save these innocent and precious creatures. And to project them and their lives. This will help us to maintain the balance of our climate and environment, on earth. Today we are seeing

fissures on the earth and an increasing imbalance. Justice should be done to everyone evening its a piece of stone.

There are many type of other crisis as well like shortage of water, decreasing number of petrol, oil etc. Till when will these last? Its always been a subject of dispute. All mineral materials are there in a limited any way and will come to an end soon. It requires to be used carefully. It's a very serious border related to our environment. And its clearly sowing the sign of shortage. Water is a boom for life for al living creatures and it is also shortage. We won't even be able to have drinking water. Life is not possible without water its been said that in future water could be the reason for way. We all human-being need to unite and find the truth of nature, to try and live naturally. And now to save nature and ourselves.

Love is needed by all living creatures, human, animal, plants, trees etc. Love is the only way to live life as it absorbs our tears and gives us a smile. And works for not only one-self instead for each and every part and particle of our world. To keep the natural beauty alive. We all need to change our minds with this type of beautiful ideology and work on it. Then only a better life can be imagined.

Swinging climate brings cool breezes and chasing clouds and in a moment sky gets the splendor of the clouds. This beautiful scene of nature fills every one with joy, humans, animals plants, trees all of them enjoy it. All of them think that their happier day's have come back. Because its going rain bringing a new life to everyone. To keep a balance in environment and spread happiness, its necessary to have rain at certain times. Because we've lost many lives on earth for these drops. And its a repeated routine of every year. No rain is the sign of imbalance in the environment, earths those parts turn into small eracks, farms, gardens and orchards dry up, coming to an end, all of these are the necessities of life. We are compelled to have those goodness of life. Nature needs justice & we need to step our euid deeds are creating a huge

imbalance in the environment. We've been misuring the nature a lot & in result Co_2 is generated on a very large scale. All the industries earning million bucks leave a poisonous smoke in the environment. Atom bomb brings only destruction and not a bit of progress. If by mistake its exploded it will bring destructions beyond imagination for years and decades, no greenery is possible on that place. That's why its necessary to bring in proper education about the atmosphere, and make students as well all to understand to protect all living creatures with themselves. This is the only love in true meanings of a human life for world peace.

*Planet Earth must appear as
beautiful as best*

WIDE SPREADING TERRORISM

Under the blue sky, everywhere, in each country terrorism is slowly and steadily widely spreading with a terrific face, with a non-ending thirst for human blood. This is the biggest concern of the work. A small country like the Vatican city or the biggest country Russia all have their own solutions to be safe from terrorism, but still the danger is increasing in each corner of world. Strangers are always suspicious. There is a thorough checking for the security purpose for all those who come and leave the country. But there is no law for time-bombs, remote bombs, pistols and riffles all the dreadful weapon of terrorism which kills humanity and happiness. Terrorism is that ugly face of humans which does not have any feelings for anyone. Then what justice do we expect? With what truth and what lie? Coz this lie has hanged the truth. And this is terrorism world has faced so many destructions to the earth and innocent people who are probably trying to simply live and help progress come for the society and children. Aircrafts are hijacked. And these ones are always busy with selfishness, by theft, killing and troubling others. They've only one thing in mind "Don't live and not let live". Terrorism has spread its roots everywhere whether its in small countries of Latin America, or the great continent of Africa, South America, North America, Australia, Europe etc. Talibaan the famous spot and place of terrorism, due to it Afghanistan, Irag, Pakistan etc have lost their identy. The terrific face of terrorism have terrific and trapped many big countries of Asia counties and is creating dissension and provoking everyone to war. Just because of terrorism big countries like India also is towards decline/downfall. Kashmir and its part which is occupied by Pakistan has got many places ready for terrorism act. And the sound of exploding and blasting bombs are welcomed with clapping. By terrifying the work what justice are they looking for? Is this

non-visible face of third world war, running happiness from the world and forcing a simple/common man to die. May we ask this group, that, what do they want to win? Why are they playing with lives? Various types of terrorism showing off their various terrifying faces. We are scarce of living each everywhere proving ourselves by checking routines. Honesty is doubted just to mentally pressurize us.

Terrorism does not believe in any religion. It only believes in bloody-battles. One of the eg: are the attacks on America (9/11) when lakhs of people were killed in a minute. That huge, tall tower of New York where the aircraft was banged and thrashed to pieces. The fire at the oil godowns of Iraq. Explosions in our country India also. All of these terrifying the citizens and torching the government, in many ways, like Shri Lanka being torchured economically. People are trying to find out solution to fight terrorism. But can we hardly control this insanity?

It has to be revised seriously. Entire world has been discussing and compromising between, then against it. But the terror of terrorism is still to its height. It's just the same. Speedily destroying earth and its creatures with insanity. To win on this we need to take the path of truth only and leave the evil. The battles going in Africa is poisoning the poors of that place. Terrorism is spreaded in many countries like Kenya, Libia, Zimbabwe, Mairacow, South Africa, Sudan, Angola, Medagaws Kar, Alzeria, Nigeria etc. Here bomb-explosions, bloodily battles from many past years has taken a horrific face now and turned humanity to insanity. And the level is beyond imagination, and become very common you can see it everywhere. Southern Asia is facing the same danger and east and west parts of Asia are also not spared. Its not necessary that only violent acts like explosion, assassination, theft etc are terrorism infact all those activities against government public property, terrifying people, theft robbery

etc are also terrorist, and all these unfortunate incidents are the result of anger and forced on others, hiddenly or openly. Behind these there are evil minds filled with hatred, jealousy, unfair discrimination etc. These negative minds have turned out to be strong enough to be defeated, but we can. Yes! Though it will take a long time. We have solutions for all these problems and we should spread them through education. I remember a song my heart always sings.

*Give Love and you get love
Neither Hindu nor a Muslim
Neither we have any religion
We all are brothers-sisters*

***Peace clean
bowl the
terrorism***

Crack down the camps of terrorism across the world our big enemy is our big negativity.

A Good education can change an insane to a human and make life happier. In the entire world there are many prayers made by good human-beings to have a good life with everyone. Our planets identity stands for good and not for evil. It today may not had any arms and weapons running humanism we would not have had terrorism also.

Come let's together built a pillar of good deeds to clean-up the earth from the evils. Let be positive and keep a faith alive inside us and carry a message of virtue and teach humaning and to live a better-life. It will help us in tough times. In this only there lies a revolution of world peace and defeat of terrorism.

*There is no bomb in the world to
distroy world peace.
So Peace defies terrorists*

WORLD FULL OF SORROWS

Our simple and innocent world struggling with diseases, poverty, unemployment and many more troubles. In our life there are so many unwanted pains that human-beings are always impatient although being blessed with a beautiful life. There are so many diseases over lapping on life that when does it begin and when does it end can hardly be noticed. Life is ended struggling with them. We celebrate a human birth. But does that baby know that this world is full of pain. Slowly the child grown up and steadily observation our society have you ever thought about those thousands of children who don't know about education, about school. Does knowledge rain on us when we read books. An unaware child does not know the pain of life. These innocent faces and eyes are always finding something to eat to drink at least fresh eater. Wandering in rags these childhoods are compelled to live a double life. Their parents fighting with poverty and illness longing to provide them a bute of food ore a drop of milk and water. Under the open roof of sky these children are just creeping towards their end, Lakhs of them loose their identity. We don't

Against anti-peace we have to make best efforts.

have perfect statistics about it. These children play and when tired they come to sleep and here they close their eyes there life ends. The rich ones do not have time to think about the welfare of the poor. The poor's don't have any sources of food, medicine etc, and are punished without any reason. If we try and figure out we find that more than 25 crore children are working as labourer. All these are found picking rags to survive life. There are no pleasures and convenience in their life. Then how can a good future and happy world be imagined? Because here at present people are victims of darkness and pain and relief for them is far away. Then how do we expect a good future for this helpless childhood? Compelled people go through all things to survive.

These numerous children are forced to steal and feed their hunger. Many of these grow up running on the evil paths of life to be insane.

Clothes, food and shelter a childhood surviving for these grown up in injustice. Nobody taught them about kindness and beauty of life. This is not only with those who do not go to school infact with those also who do go, and are blessed with human justice. These students leave education behind and get attracted to things against law and order. On this path there are numerous students in the world. And this is because there is no one to teach them the fact of life, and human progress. Fresh statistics tells us that population on earth is more than Six million we have great talks and big promises of justice.

Out of this 50% population is under the poverty line requesting for their part of justice. There are thousand of trial plans bought in the name of welfare. More or less they success also. Food, shelter, clothes, education, pleasures and convenience is provided door to door, still poverty is ahead.

Hospitals are daily coming up but disease also keep multiplying in the world. That's why each hospital has everyday got a huge crowd of sad faced people hoping to survive life. Anyone asked in the world that whether he wants to live answer is "yes of course", because life is like a boon, them whatever tough situation arise. Everyone fears to death. Whoever it may be a human, a thief, a terrorist or insane. Nobody wants to loose the treasure of life. Then why are so many dangers hovering about war and battle? Come lets together accept the truth of life ,and teach everybody the principles of live and let live. It's a small duty of ours which can do wonders to make our life good. There are laws and orders to protect life. Because treasure of life is in the pleasure of life to live. This is the human right for ever. All creatures are a natural gift. Everyone lives life in his own way and eat what they like. A true human being never hurts others, lives according to humanism, helps people and government and remains honest. Have you ever though about those people who are not able to utter a word, are not able to enjoy the loud musies of life not able to dream about happiness in world, and those ones can't stand on their legs without a stick the poor handicapped ones, who need a wheelchair to move and depend on others. There are a large number of people who are handicapped. In India itself there are near about 6-7 crores of them, and if we calculate all the disabled ones of entire world the digit will be beyond imagination, and though. These people are forced to walk on the thorny path without any help and kindness from others. And the others are almost indulged in their own self and never bother about these ones nor have any kind of feeling for them. Those innocent and disabled ones are compelled to first loose hope, identy, and wellness behind and embrace diseases and limpness, and its a very old fact and truth, due this the innocent people are punished.

Entire world is being trapped with small or big diseases, and the most common one is diabetes, and is found in each house its also known as slow poison. Tuberculosis, cancer, Aids, HoIoVo etc deadly disease have rained the happiness of world. No continent has been spared. Science promises to keep people fit and its a good effort and a matter of happiness. In this way the world is rapidly increasing the pleasure and convenience for people, and its necessary also for human-welfare. Still numerous people are victims of small or big diseases. Or it can be said, the half people of world are surviving their life with a blanket of sorrow. Then what do all countries expect from each other? What protection do we talk about? Which unity? Not only this unemployment is shadowed on the sky. Many peoples are wandering with their degrees in hand. Alas! Is there any door open? Someone to listen us & us food, shelter and clothes. Then either a street hawker or one with a white collar. Everybody expects social justice.

If these people are questioned that what type of justice do you expect What do you hope from us? Answer will

Who is responsible?

be “The right to live”, to take care of our family and help our society in its progress”.

The only solution for all these burdens would be world peace. Or we can opt for an option which is capable of protecting nature and human welfare both, their conveniences and pleasures. This is the truth of life. Million of pests, birds and animals demand from human the right of living. Today there are many species of animals which are only in the history. Tigers are steadily disappearing from the earth. Their number of presence in a huge country like India is only 1411.

Rhino is the another wild animal to start disappearing. White elephants are rarely found. White deer having musk are also one or two. Black deers are only heard not able to be found. People have kept hunting them for their self sake and hunger. One of the major reasons behind the disappearance of these animals is deforestation because of it these animals became homeless. Slowly and steadily forests have been decreasing from the world’s face, from all the great continents. Human-beings have been destroying forests blindly for their own shelter. Due to this we are in a big trouble of natural calamities and global warming. Our mistakes have taken an ugly face. Many rivers are polluted, pools, springs, water falls lakes have turned to poisonous sources for life, as we have snatched their purity. Even the cause of having very less rain and no rain is the same. Birds sweet and melodious voice are lost in the loud noise of world.

It’s a duty of every country to keep their land full of greenery and to provide protection to birds and animals and encourage forestation. Try and keep all drains and gutters clean. So that this huge earth may be able to give fresh air to birds flying, animals creeping with freedom, and be pleased with the treasure of earth, happily singing the song of unity and welfare. History is been witnessing the upheaval

on the earth due to which all earth creatures are facing many type of difficulties and numerous innocent people die trapped under injustice. There are many examples of this in North America, who lost their lives by being victims of violent storms, earthquakes, heavy rain or excess cold .These incidents keep repeating from time to time. The other example is the terrible earthquake in Hiti of South America. It killed lakhs of people in a minute.

Brazil, Argentina and countries of Latin America etc. Probably any country is lift untouched by these natural calamities. Different from these Africa is being a victim of poverty more than other natural calamities. Every year flood brings a huge damage and in summer people die due to heat for a drop of water. There are places on earth which are affected with heavy rain and due to no possibilities of agriculture people are forced to live on animals. A big area of mid Africa is affected with the same burden. Western and South Countries are affected with other demerits like theft, robbery, killing etc, and people are bund to live on these bad ways to survive life, and believe in the same. The same pitiful scene in Asia also. Lakhs of children are forced far begging for the sake of life continuously. South Asia is teaching less ones of these problems, showing it to the world in the mirror.

Life is moving towards dark from the light of happiness. Due to these insane things Vietnaam and Sri Lanka have become useless. The same situation is in the countries like Laos, Thailand, Combodia, Burma etc. Physee and Africa had undergone terrific riots and quarrels due to the colour differences. There are many problems spread in China and India as well, along with burders of natural calamities too. Europe an economically strong country is also not left untouched by these

natural calamities. Many other countries like Australia etc are also trapped by these natural calamities.

Apart from these diseases are also killing people. Every moment there are many accidents happenings with all, either the ones on road or the ones in the sky (aircraft), helplessly loosing life. Cities like which is situated at the north side of India and is 11,500 feet above from the sea-level are also flood-affected according to the basis of geography.

A situation beyond imagination arises when a natural calamity of heavy rain-fall comes, clouds burst up and instead of drizzling water-drops there is tremendous rain with non-stop destruction.

People say that this was lesson for all because of China trying for rain with artificial clouds and if you challenge the Almighty he gives up back to you. They tried to play with nature and punished them. And not only China there are many other countries also trying to do the same. People are busing their selves behind the delusory of the world forgetting the real truth. All lusting for the happiness which does not exist.

Due to these there are natural changes accruing in every country and it's been said that the world will be famine of water and people will have a drop of water to drink even. And then people will turn insane and will have a thirst for blood of each other.

The western parts of Asia are trapped with warmth and heat, killing people with its effect. Same situations are seen in those places also which had a pleasant climate earlier, who were bathing in the beauty of nature. It's been predicted that due to the fury of sun entire solar system will have to face major changes, which won't be good for human-beings.

Pollution too is on its peak due to which the normal air is filled with germs and bacteria spreading foul smell. Helpless people are compelled to breathe the same to survive. Pollution has encouraged artificially especially in food, and forced people to intake medicines for healthy life. Climate has lost its Excellency of creating natural and delicious tastes in food, veggies, fruits etc, and in result we are unable to get the real taste. On the other hand now day foods helping us survive do force us to visit the hospitals. Till when will this poisonous game, having dreadful germs and virus floating in it, be on? Earth is being tapped into this and unfortunately humans as well. Come on please lets together find out a way to save the earth and its human beings as well. To end evilness we need to adopt goodness and truth and try to find out a solution to protect our climate, plants, forests, birds, animals, humans all living creatures of the earth, to live life happily.

Believe it, if we put in our efforts we can turn this dream come true. We need to restrict our use from involving in the activities against humans which is breaking our

chain of unity and we are loosing our rights of living, eating, drinking etc.

We need to form a non-polluted world which is a part of world peace. Its necessary to put a break on garbage, smoking chimneys, running traffic explosion materials and atom bombs etc. We need to stop deforestation and encourage plantation, to give shelter to the birds and animals. We need to increase the number of forests we have to give birds and animals a new life. Efforts are made to keep the gutter and river lets clean. We need to try it more hard. At every places we need to teach everyone the lesson of saving the earth planet. Schools, college even people at their houses may know about this. We need to show all the present situation in a mirror. So that people living on this earth may get together to save the earth, their shelter and unitedly work to encourage unity. It's very difficult to work or take a step for others welfare, but if we do it we will be blessed with true happiness, and have a pleasant climate with loads of natural beauty the world is longing for.

ENDEAVOUR FOR EDUCATION ON PEACE

From the time when human-beings have been blessed with the power of thinking and understanding, they have separated themselves from other living creatures, and created their own society. They disliked living in the forest and started living in a house made by woods, and hay collected from the forests. And in this way they invented the village. Later come agriculture and human-beings started farming and growing food for themselves, and they also started using animals in different ways to help themselves, like for farming transport milk etc. Now human-beings had built a different identity, and separated themselves from the wild animals category. They started a family and upbringing of it, making an effort to change themselves to socialized & civilized ones. It was happening all over the world, according to the place, climate and conditions language was also invented to understand each other.

Besides all these there was evility as well, quarrels, battles, theft, robbery, killing etc. There were battles to either

*Students love to receive
the thoughts on Peace Education.*

protect their area or to increase their area going on, and later there arised many other type of troubles as well.

History is been the witness of the troubles of the world making people enemies of their selves. All countries had the same problems, and till today we've got many more ones added. We must know the truth of life and generate a good face of world. To improve the world, education was improved so that the world may be able to known the truth of living and life and embrace them. Decades before also there were efforts made to improve our education and society. Till date we are putting our best efforts world wide. Its true that education has brought moderation and revolutionary changes in human-life. Slowly and steadily there were many inventions, miracles etc by the help of science proving humans intelligence, but people are still impatient as evilism is all over spreading, negativity is not ready to end as its the main reason for evilism. What ones behave like illiterate and foolish ones. Life looks less, with having no signs of peace & happiness. Anger and hatred was always strong. Rubbish language always was used them also and now also, generating huge differences. Thus unity was breached and war was encouraged. This gave a clear sign of pieces of human species. Many examples came across in which small battles turned to world wars. 1914 to 1918 was the first world was and 1939 to 1945 the second world war, which thrashed the world to pieces. Every country suffered with huge crises and problems of poverty disease, unemployment, illiteracy, differences among people and terror. Humans turned to behave like ampires and kill all to drink blood of all and jumped into the well of evil, denying the truth of life.

These unforgettable incidents of our history force us to give a second thought on it, to learn from our mistakes and change our path towards the protection of our world, humanism and prepare a stage for world peace which is too neces-

sary for us. To bring revolutionary changes and bring humanism and the charm of earth back we need to improve our education clean and clean like a mirror. If we give a look on our books today, I don't find any books of any countries having the lessons of truth about life. It has only stories about themselves, distributed among the students. Growing students have a negative thoughts and are dreary about their lives. The reason behind it is that highly educated ones also are not positive about life and this negatively is the biggest weakness inside them. Because we were not taught about the truth of life at any place, house, school, or by teaches, due to this its quality of intelligence in students did not help them and all came under the same category of illiterate ones. The truth of life can be known through the medium of peace education, it helps us in recognizing the charm of world, the reason for our birth, far death, for diseases hanging on us, the reason for anger why can we not continue happiness and peace? What do the stars, sun and moon say us? What does our thought show us Who gave us the power to speak? Why to our eyes see do? What was the purpose behind the formation o body What is the first duty of human-being? Why is there such a big difference right and wrong? Between truth and false? From

No need anti-peace act

where does air and water come? What do the clouds and sky tell us? Why was nature formed? Where is the rain of happiness? From where will we get peace? How can we bring unity in the world? What reason propagate world wars? On the diagram world we need to give these the face of true answer. So that good education may produce good people. To this education on peace is necessary and needs to be propagated and involved to the syllabus of schools.

The way we describe and define different subjects “Peace education” also needs a brief, definition and a brief description of each & every student. So that all student in this world may surely have education on peace with all other subjects. So that a true, fearless and kind human may be born inside them. The man who wipes others tears, shares others sorrows and pain and sows the seed of unity, happiness and peace. The man who’s got the right of being a true human-being and keeping unity in his society and world, around. Peace education gives birth this type of human-beings.

Life beings with an impatient cry if a baby just born does not cry it’s a matter to worry, why he is not crying. This is the truth of beginning lie, coming with colours and features of human-being to watch the amazing charm of this earth. But we have some more facts also because the moment the baby breathes his first breath in the world pain and troubles come along and from that very moment death starts creeping towards birth. Here we spread happiness on the cry of baby congratulating each other for a child coming safe & secure on the earth to their family. These children grown under the help and care of their elders, hoping for the child to be good human when grew up, making his family and country feel proud of him. With stumbling a small child learns to walk, and starts adopting the activities of society and use of language as he grows up. Then he starts going to school for education about new ideologies. This is a general and common

thing in each family of our world. Parents hope and expect that their children will score good numbers to be promoted to the next class. Life keeps moving according to its climaxes many of expectation meet many of diseases against our expectation. Children and their family are affected with poverty and unemployment. Means there are many painful walls around people disheartening them all and their way of progress. In spite of all these pains human-beings survive to live, sitting in their own boat of difficulties trying to move ahead, in the journey of life, hiding his tears and pain trying to gain some smiles and happiness in life. Hoping for a better future.

The lesson of the basic needs in life and the aim of humanity helps us fighting with the pains in life. We need to moderate education and add the ideology of peace education to fill anxiety in life right from class one till the last one, to bring positive ness and happiness in daily life for human beings. To make them capable of distancing negativity and create a revolutionary positive ideology through the medium of education and sprit in our society. So that humans may not bow at any type of troubles in life and be strong with their ideology, capable of reforming their life, society and country, and help the country have a breeze of new thoughts and ideology. And this is possible by peace education only. Thus it should be a compulsory subject, to all age of students and classes with the easiest to the toughest one chapters on it. It will help children learn about the lesson of love, peace and unity from childhood itself, and be strong. By the help of small and true incidents we can teach them about the positive ideology and language of kindness with the help of peace education we can have children enjoying education and not taking it as a burden. They may have a good sense of humour for animals and birds. They may be influenced with the charm of earth and promise to save it, as a strong desire in life. Small students may be involved in drawing competitions on world

peace, on a large scale, through music there can be anxiety created inside them for love of life. It will help children in accepting the truth of life and move towards progress.

Its true that the path of truth is not easy at all its a tough challenge. But to walk on it is the aim of world peace. We find many students who are upset due to some or the other subjects and are not able to get education through many reason in life. We need to pull off those reason & from their way so that children from all away the countries in world may have the right of their living hood. Good education generates good human. We find many people upset in their lives due to no education, no food no shelter. This situation is found at Asia continent, Africa continent and many developed countries even have this rain of pain, giving birth to numerous sins. There is poisen spread on every path of life even food is not spared, resulting hundreds of countries to suffer. This is making the peace of world more weak instead of making it strong. Through the source of peace-education we can solve all these problems and sow the seed of welfare and unity. Helping us like a big miracle in the world. People are wandering here and there impatiently far food, water a nice shelter etc through various ways, just to live a good life. Slowly and steadily we are able to win these condition also. Umemployment, desease, poverty are nearly on an account under control. The world is quietly but undoubtedly clapping for it. Besides these there are some other problems also which demand a solution i.e. activities against humanism. We need to change them to the activities of human welfare by brining a change in our minds. There should be a sweet language used by people they may focus on unity and welfare. By focusing on unity and welfare, "World Peace" should be given the rank of an international language and it should be declared as soon as possible by united State Association with the acceptance of all countries. Because this language will

not have any script so that it may be applied with out any difficulty and objection in all countries with what so ever language is being used there may be honored and world peace may be propagated in their own language by increasing it's charm and beauty. So that even by mistake we may not hurt anyone by forcing our own language to it. We can improve our relationships can encourage world peace through love and soft words only. The language of world peace depends on human qualities only, which always wins and is worshiped. It's something like air which cannot be seen, like you cannot court the waves of a sea, you cant imagine the fury of sun etc. you can only feel it. Two lines I remember and want to share with everyone,

*Peace isn't something you buy
From a market, or cook,
It's something you feel in a touch
Or a look?*

To keep humanism alive and live for other welfare is the quality of peace, and that's why it needs to be reformed

We require peace-related meeting seriously.

by “World Peace” by grading it as an international language. For this we can fix a day in a year. And this language may be propagated by the beginning of education adding it to the syllabus.

So that we may be able to build pillars of human qualities, tearing off the negatively and artificially inside us and warning truth on us and our children. Sports may be encouraged

Change this activity into welfare as much as possible, this will encourage humanism internationally and create unity, world wide with a huge round of applause, forcing insanity to adopt humanity.

Children will not be burdened with extra and useless education, instead they must be filled with the charm and truth of life, so that, children may adopt as much as possible peace into their lives and be a true human being. Because peace is the only way to bring in positive thoughts and a lesson to speak a good language, it spreads smile on us. We must sow friendship seeds among different countries, show love for birds and animals, and make paths to protect nature. It’s sad that even after two destructive world war’s also our people are denying peace, and innocently sparkling the fire of insanity, which in future can turn to the third world war. Production of many fatal weapons is running all over the world. The only way to save the world is ‘Peace’ , as its the most strong amour of all. Students will have to be sworn to save life and enhance the beauty of world. Every one should sow the seed

of goodness and provide happiness to all. All countries should be saved from all types of wars. So that the beauty of world may keep growing and the world may be free of arm and weapons & warms Poor, homeless, helpless people may be enthused with life. Life is like an interesting book the more you read the more you enjoy it. Kindness and welfare are true friends of life who help the helpless and shelter the homeless. It's like the light of a full moon loved by all we need to find a new moon of world peace, and have the pleasure of its light and enjoy the rain of happiness on earth. This is the dream of world peace.

To explain peace education briefly we need to know about the geographical science and situation of all countries on the map of world, to know exactly about the number of countries each continent has, type of climate and the natural environment they relate to their food and clothing, their way of living, how do they take care of their farms, forests, and water sources. It's necessary to collect all these information, about all countries. Some countries have many problems, some have less. Through the facts of geographical science only students can be related to the reasons of wars and be able to find solutions to the problems of not only their own country in fact for others also. Due to what reasons is life scattered? Why does unity need enhancement in the world? People need to come forward and pull off the reasons for all kinds of troubles. As for the aim of peace education we need to live to think, to work, these lessons need to be taught to students world wide is a sweet and clean language. To fill their heart, soul and mind with humanism, and bring the happiness of world peace to work as well as strong countries. Most of the countries have been noticed for the basic needs of life like Euthopia, Somalia, Sudan, Afghanistan, Nepal, Sri Lanka, Laos, Cambodia Vietnam, Surinam, Iraq, Madagascar, many other countries of South America and Latin America and continents of Africa and Asia etc. People here are dreary with life,

struggling with problems like hunger, poverty, disease, unemployment etc Many countries have dreadful disease spread into their huge population, that's why they are unable to climb the ladder of success, and always come on a low rank compared to developed countries. But now slowly but steadily these all countries have started progressing and it's a good sign for human-beings.

I would like to introduce you all with myself through a small incident. It was first January 2006 we were celebrating new year with the first day of world peace (tried to be declared and celebrate along new year. On this occasion all people had gathered with us to celebrate it. Big, small, teachers, students all of them celebrated and started the new year with positive thoughts of world peace, and speed our life with well wishes for all. This fortunate moment was being celebrated by people and me in our country's capital New Delhi's famous spot 'India-Gate'. It was evening time, our main aim was to celebrate the occasion of new year as an international peace day, because on this day people are happy and filled

Let us have peace army in the world.

with positive hope for the year coming ahead. We started this from the year 2006 right there and then duty took permission of the government of India. And celebrated it by involving students also, to make them understand that his celebration is evolved with protection of human, humanism and earth, and we need to be mentally prepared for it, honest and ready to save ourselves. To have happiness raining on us by bringing world peace, this will help us bring major changes and make the world dance and sing will joy the song of world peace.

World Peace gives a straight forward message of humanism and fills energy is students with the help of peace education. World peace is a natural charm found every where, human duty is to understand and adopt it A beautiful mind generate a beautiful human being, good ideology and language is the source of success, and a negative mind a way to failure. Peace education is the medium to turn this failure to success. The life in our life time is not too long to find success, instead life is too short in front of the treasure and knowledge of life, and the happiness received by everyone at each place. Good thoughts show us good paths to replace sadness by happiness on earth. A clean and dear sky has many twinkling stars which fills numerous human hearts with happiness. These all happy moments of nature are made for human beings happiness. There are many other examples given by nature so that humans may learn from them and be a provider of happiness, be honest and simultaneously face the troubles with solo faith and strong will power. Carrying the bundle of love, life happiness and ideology we can win humanity be walking down the path of truth sending a message world wide about the ideology of truth, but filling anxiety in the world by the medium of sports and games there is a seed sown of unity. All type of sports encourage peace education and create a bridge for world peace. All games give a message of one and only world peace. Games like Olympic games, Common Wealth

Games, Asiad Games, European games, World up football match, world cup hockey match, World cup Cricket match, etc all give the same message and shower love and affection for all countries is very helpful and carries us to the destination of success. Its been said and believed that sports fills up students with the joy of loving life and hope to secure a good future to live long and help finding solutions to each and every problem of life. World and life is being identified by the welfare done by them. So why do we not initiate the same

Hi Mr. Hitler

ideology to each and every school so that all students may be able to get social justice and human protection. Its a It's like a melodious music which generate great soothing sense of humor. And makes people rock in ecstasy. To be happy is a right for each creature on the earth, just

like each bird has the right to fly in the open sky, animals and humans both have the right to live under the open sky, according to their own style. We should not forget that we are the most beautiful creature on the surface of earth who have the power of vision of feeling, speaking and understanding and the power of enjoying each and every moment. Humans are the only ones who are gifted with this power. World peace has the best qualities in it about goodness and truth. To wake-up children and make them revolutionary for more and more goodness to be looked which will be called a first full education of peace. Come lets imagine a new world and a new man who has got the aim of world peace.

NO WAR NEVER WAR COMPROMISATION

Insanity has always been there in different ways. Due to enmity, hatred, jealousy and selfishness human beings have always been opposing each others. This is the history of all the countries small fights to the major stirs among countries due to enmity and jealousy and till today these are been there, pager of history have gat them in detail. Due to the growing enmity crores of innocent people are victimized. And its a routine till date. Life is like a carpet of troubles, we are busy increasing these troubles instead of finishing them. This is a sour truth of our earth which has screams of insanity an life. There are tears dropping like rain drops. History is the witness of all, showing the troubles of life and the mirror of insanity hides the truth of life and teaches us to walk on the path of lie, running its natural beauty and turns it to an ugly face. Shows injustice towards animals and birds. This insanity is spreaded all over the world like air and killing people without any reason and unemployment, deseases have made its roots all over as well. Because human beings declared the enmity against humanism and its heard today also. Wells of death were digged everywhere to turn earth to a wild forest.

Smile is snatched away from children's faces & the game of the power of enmity was played. There were huge difference between different religions of people. Life us tangled in the net of troubles, good dreams had stopped coming. There was a huge difference seen between rich and poor, evility was growing instead of goodness. Stars, moon, sun all were and still are embarrassed all worried with the insanity going on the earth. Almighty God who created us with so much of beauty, had never though that these will start tyrannizing each other, and rivers tears will be flowing in life. The world's map was turned red with human blood. Slowly the world started seeing the mirror of truth and understand the definition of life a little bit. Science opened the eyes of people by its facts. Negativity started disappearing & smile spreading in the entire world, people started to work for a better life line. In the other land the pillar of truth started getting strong. Clouds in the sky were singing the song of truth, so that humans may smile and be honest among tem and try to live happily. Small fights had reaped like a farm of negativity, And them in between them if anybody tried to do human welfare or tried to awake and aware them by his good ideology ten he was denied and his ideology was hanged. Just like Jesus Christ who came here with a different face of human to save humans and enhance human culture, but was hanged for the welfare he did and he had to give his life for others. But nobody could kill his ideology and the third day his ideology opened peoples eyes, evil started disappearing and humanity started spreading. This is the biggest example in history when man prepared a way for goodness on the earth then the devil destroyed his way and evility made home here and the young children started walking on it and there was negativity in the society of each place. It creates a stormy wave which destroys the truth of life. Evil grows inside everyone and peace is destroyed unpeace atmosphere is prepare. Life is like a wave of river which is loved by all and its sweetness feeds the thirst

*When First Atom Bomb dropped Japan's
Annihilation 1945 A.D.*

of people. It is praised for its clarity that shall bring peace and unity along with goodness and distancing badness, helping to shower happiness like flowers on people. Peace education sings about the beauty of life and awakes people to know and realize the beauty of earth. This is the truth of all countries flowing like free air giving its message to people and filling the realization of the goodness of life and help remain for ever. This is the aim of life of world peace being alive in them like a medium of inspiration to live. History slowly kept moving ahead and the world kept dividing on the basis of religion and language, people spreaded in all the great continents against dangers. Humanity was sold in the market of insanity and differences started dividing the earth. The game of who can win whom? Was on a speed. Kindness was lost somewhere and love was replaced by hatred. This was a fast act on each corner of earth like a routine of storms. Rivers had waves rising of ugliness of humanity creating fights and quarrels increasing rapidly. Cries were changed to screams. And the lake of troubles started spreading towards each corner of the world. Everyone wanted to increase this area. The group of people who believed in insanity kept preparing their forces and power to take possession on another countries. This was a routine in all continents whether it was the countries in Latin America and continents of North South America and continents of Europe and Africa were divided among themselves. Continents of Asia and Australia were also having this routine and it created a pathetic war ahead citizen of earth planet had forget truth are were behind the lie. Killing one another to feel the happiness of life. In a straight meaning it was humanity turned into insanity. Quarrels had taken a major act at the neighboring countries. Identity of people was to torch ours the maximum to others. Decades turned to centuries and sorrow kept growing. Arms and weapons were made on a big quantity with bombs and exploitary substances, creating new sources to war. World was divided into two pow-

erful parts. The one who had the more weapons and forces kept fearing and possessing the weak ones easily. Due to these there was a major stir in the countries with huge differences seen among them. Time kept running and 20th century came & the history was its witness about negative thoughts and battle among people. When there was 1st world war inked on the map of India in the year 1914-1918. This world war brought terrified results, lakhs of people lost their lives without any reason and lakhs of them became homeless, countless people were injured. This became the history of insanity which was beyond imagination and dream. Everyone there were wells of death. People longing for food, clothes & shelter were shedding non-stop tears forced to walk on the carpet of thus in war. All countries had battles among them. Despite all this there was a clash between the countries various & strange incidents were still seen & time slipped ahead slowly. Due to the incidents, struggles fights, life looked like black clouds. This unknown darkness was pouring like dense clouds. Other than all these the series of making new arms

Need to prevent our planet Earth from 3rd World War

and communion was going on because, due to this war mutual differences had grown to a great extent, aggression for one another had developed. Those countries of the world that were more in umbers were raising the protests of their respective countries. In some or the other corner of world with the declining day, the smoke of the ammunitions were furning contiously. During this time may countries were struggling among themselves and this struggle turned out to be a war. All the countries were the enemies of each other. Because this world was not aware that due to war there is a great loss for the earth and humanity and we have to face poverty illness, illiteracy, back ward ness and non development. The network o these problems has covered every corner of the world even today. Man is wondering in search of the truth of life. Even after the first world war thousands of people were begging for their lives and darkness of their future had covered their eyes. Without no reason animals and birds perished into the arms of death in this war. Natural beauty was destroyed. If any country was to be asked that how much satisfaction did it receive from this war, the answer will be only expressing deep sorrow and nothing else. Because arms and ammunition are being made only to destroy humans, not to protect the lives of humans. Even after acquiring knowledge, we couldn't learn anything. The thoughts of mutual struggles went on increasing and gradually the ammunitions that sowed only destruction were also geing created. All the large countries were proud of their power. In this way the doors for wars were opened. The attack by navy and air force in different countries resulted in second world war. This second world war that started in 1939 created a fear for all the continents. The clouds of this dangerous smoke spread far. Ordinary man started running better skileter, being homeless to save the life of their families as well as own lives. The flames of its fire was affecting everyone. Months and years were passing by and the clouds of war were busy in playing their own game

human life was totally eclipsed. Days and nights shed tears. The pitiful sigh and cries of man and children were all surrounding by the war in countless numbers. The whole world war in the rap of sparks of the fire of war. Peace, sleep, happiness were snatched from life. Man was pined by hunger and thirst, begging for breathes of life. The sounds of bullets and bombs were drumming at all places. Scared people were shattered here and there for life, trying his best to protect him and family. But the war was unlimited including the cannons and fighter ships the war created a enactment against humanity. The war enlarged in the year 1942-43 because there were many countries standing in the war filed against each other. The forces were moving ahead with the flag of anti humanity. The greatest fear was created in Europe and Asia. All the countries were after the blood of one another. They were not seeing any other thing than destruction. Lacs of women and children had lost their lives, people were injured in big numbers. The same story was there in each house. No one knew what would happen next. Nothing was visible except the fear of

Serious consideration over peace subject

death. The weak and poor countries had to suffer the most. In due of course a very powerful and destructive atom bomb was dropped on Japan by America. In the year 1945 on 6th and 9th August 2 main cities of Japan, Hiroshima and Nagasaki were totally destroyed by the atom bombs. Thousands of people perished in the valley of death. A very pathetic scene of countries families injured and crying for their basic needs was seen. This scene was mesmerised for ever for the whole world among with 7 biggest incidents marked in history till now. Because these incidents showed people the destructive image of atom bombs. Due to this, till today those atom bomb affected parts in Japan are unable to produce any plants, trees or ever grass. And for the prevention of all this people gather from all parts of the world every year, for some preventive measures so that this kind of destruction in the atmosphere may not affect any part of the world any more. We have learnt so much from these wars, regarding the welfare of humanity. Despite all this we are preparing for the third and last world war. The last two world wars have taught us such a deep sorrowful and bad experienced lesson that wars only shatter everything and that they are the biggest enemy of world peace. Still god known why and due to who's fear all the countries are spending so much to improve their army and air force. Denying the truth and going against the human welfare what are they waiting to improve. They are trying to create the best dangerous weapons. If any countries were questioned about peace, then of course the leaders and the citizens of that country wish for peace. Only after stepping ahead on the path of peace this world can be like heaven. For the progress & protection of citizen each and every country of the world has to accept and cooperate completely with world peace. This is the one and only safety band that can protect this world from quid and tend then to move towards goodness. Wherever wars have developed only differences are seen. Instead of man progressing he is forcibly turned towards poverty, unemployment

& illness. In this situation which country can emerge as a winner and who can be blessed. Whether it be the small fights in the family a big wars between nations, no one was attained peace except for sorrow, apologies we have got nothing. Love is now only a word. When we are going on damping and burying all goodness then how can we hear the voice of truth. The citizen of the countries of this world are contiously worried about very serious topics. If we try to think and understand about the major reasons of this problem we find out that there is no peace any where in the map of this world. These dark shadows can be forced to vanish forever only by adorning the beds of peace and constructing paths for human welfare. What ever this work is in progress, it is with the help of education to relieve people from stress problems and sorrows. New hospitals are being constructed, new medicines are being discovered for the cure of dangerous diseases food clothing & shelter are being provided to all. The production of craps in farm is enhanced so that all get proper food and feed relieved. New techniques are invented to provide all the facilities to all, Thousands of new ways are beign created for

More agriculture production may vanish our hungry.

the unity of nation. The mutual relation are made stronger so that every man can live in peace. This encouraging steps have made a great difference in the progress in nearly all religions that is very essential. But on the other hand we are spending much dollars blindly for the manufacture of new and dangerous weapon which living being do we want to scare and which country is such a big enemy of ours that we are wanting to beat if to finish it completely and receive a trophy for this. We are inventing so much money in the market of weapons to buy death of mankind. What kind of justice is this where most of the population wants a bow of food to live in peace and we are farcing then into the fire place of weapons by taking away their right of living. Millions of dollars are spent everyday.

Making children unhappy and poaring the poor countries, there weapons are being sold to them because this is an age. Where there is no peace without reason. The mental stature of these countries are decreases to such an extent that these poor countries – instead of progressing on the right path

Kindly consider to keep smile at everyone's face

they are getting used to do destruction & avid things. The government's here also are so scared that forgetting all the manufacturing of better weapons, atom bombs, gun power fighter ship etc. If the public questions them that from whom will these weapons save us, they wont have any answer to give. This is the truth of the world. The poorest countries are also so busy in making a great collection of the weapon. They also wish that they too had atom bomb's what kind of strange thinking is this? Doing injustice to themselves, these rich and poor countries are encouraging the danger of war in world. Imagine if the third world war starts due to any reasons then which country will be the winner and which will be the loser, million and million of people will receive only injustice, instead of justice. This is the truth of the world of earth. Ignoring and not adopting the truth in which search we are so busy. All the countries talk about world peace but by mistake on knowingly they are lighting only the candles of dread fullness. This is the biggest mistake against humanity. On side wiping their tears and other side running their happiness and creating an ocean of sparrows and problems. Which type of worlds rule is this? Let happiness prosper in the lives of all ,and all human of this world have their right of living go on spreading love because sorrows have been powering without letting us know. Unknown diseases are emerging and the series of problems and pain will go on in this world. The answer of all this is that we follow the path of peace & create new paths so tat we can come to know about the truth for which we have to ignore the negative mistakes and sow the seeds of unity and brotherhood. This will be the victory of peace. Its a natural truth that God has created this beautiful world and its valleys. God blessed man all the creatures so that they may enjoy life on the earth. The gifted human with beautiful thoughts. He created the universe in such a way that it is overall decorated with beauty and wonderful things from the depth of earth till the heights of the sky. He gave all types of pleasures and convenience to the earth and the sky and

human beings a life time near about 100 years or bit less to live a good life, help others save and help earth in its progress and then get back to the same world from which he had come by the grace of God. But he was not knowing fact the human beings he created will ruin the beauty, colour and structure loose their relation of love in life and will create new dangers. And this truly come out when they picked swords in their hand & became thirsty for human blood, creating new bombs and explosion materials. Stole the beauty of earth. Due to its all insanity lakhs of people, children, small ones, big ones, ladies were hanged to death without any fault. Because people who were attacking had turned wild. Kindness had died somewhere. People were ready to kill other day & night. People were playing the game of showing their strength and troubling others and enjoyed it. Same situation was taking place with the countries, the weaker ones were being the targeting of stronger ones. Small fights and quart had turned to big bloodily wars, because at every six out of ten people had a negative thinking with them. There were storm against humanity and its still heard loud from all carness of the world welfare is today also ganged by the devoid, means bad is winning on good. And this is paid by crores of innocent people. There are thousands of go dower filled with atom bombs and dreadful explosion material in all countries. Out of these if

even one is used against any country that also by mistake then it will bring fatal result to the citizen, plants and trees, animals and birds etc. What is this happened by humans? Humans mind have got avid and are ready to snatch food,

shelter and clothes of others and then kill them. Everyday they are finding new ways of insanity. What justified in this? People call them intelligent but is this humanity? One who hurts others and himself. It's getting too difficult to save ourselves from its danger if bombs and explosion materials are not stopped making. Poverty, unemployment, illness etc of the world cannot be removed only by discussing it. To keep the beauty of world last for ever and for the welfare of human being all countries from the world needs to work ahead on it united as soon as possible, and create the stage for world peace. Because this is the only way which can help all the countries in getting justice & live life happily. This truth needs to be accepted by the world and be compromised with their suggestion and understandings. So that we may be directly saved from all of the dangers ahead most importantly by the third world war. To turn this dream into true its necessary that all those countries who are registered under U.N.O. or are certified by U.N.O. need to submit a compromise of a written mode under the banner of U.N.O. Due to which they may not have any danger from their countries among them. This compromise will be of NO WAR NEVER WAR. In the assembly of U.N.O. which is held in Sep every year all the countries head come with their own suggestion for world peace. In this meeting 193 countries get up. If all the countries give an acceptance on this compromise of NO WAR NEVER WAR under the leadership of U.N.O. then no country will have the fear of attack and the world will be free of war and danger, arms weapons and exploitative materials also. There won't be any need of bombs and missiles to be made. Due to the help of these compromise only the world will be able to develop and get justice. Then only we can see the glimpse of world peace on the earth because by this we will be able to save the money blindly spent on the creations of arms and weapons and utilize the money on the development and welfare of human-beings and build ways for unity in world. We will be able to break the walls of pain and sorrow & be in the arms of

happiness, and this will be called the real truth for people and true welfare for them, a dream coming true of the innocent people. Under this agreement all the countries need to submit a promising letter assuring that they would never war, or with certain condition come to a decision of no war never war. With the help of this compromise the dream of world peace will come true if the wars will be stopped for ever. Anyhow people may be put on a way of progress by assuring to save the charm of earth and protect it. So that no country may be poor & all may be singing happily with the pleasure of the welfare & continence provided to them. This welfare is the only thing which helps in life, to others as well us. The compromise can help us make the entire world free of arms & weapons and of course war free also. And in a straight forward way we will at least be able to stop the third world war & destroy all these dangerous arms & weapons all the countries have & help people get their happiness back in life. There are crores of people who've been fighting for life in their lives, living in a house of problems which is terrifying them. Because if deeply found its seen that these ones are the victims who lost their shelter, food, clothes and now are on a pint to be killed. Everyday there are million of dollars spew on manufacturing new arms & weapons and their is a war with humans directly an indirectly. What justice is this? And who welfare do we talk about? What stages do we want for world peace. All countries are requested to not only gather up to talk infact try hard to turn their challenges true, & this will only bring the awakensness of work peace which will sing the song of welfare in all countries, and peace revolution will take birth & help this major compromise being new colours of joy for people.

North Korea has recently challenged world peace by manufacturing the atom bombs & creating danger over the world. The battle is going on between Izitans & Phylitions. Iran is also sending signals of manufacturing bombs by him & Iraq is crying in front of the world to regain its identy. All

*Every nation must have cordial relations
with neighborhood.*

CHANN/ANILDI AP PHOTO

the countries of Arab can unite & fight, far oil or water anything. Countries of Africa are fighting poverty and requesting for justice with unemployment hanging on their shoulder save situation is worsening South Asia. East Asia is destroyed due to the natural calamities happening there .The same type of burdens with a negativity against humanity is seen in the countries of Europe and Latin America. North America and Australia continents are also victims of these burden terrorism is also challenging all countries like wars. I think and according to me if we seriously discuss an this compromises it will bring a new face and form to the hopes of humans & will also do justice with the happiness of people. It will end up, terrorism, which is powerful due to the arms & weapons continuously destroying our earth from somewhere or other. This compromise will bring possibility in the whole world for peace and development. All the money wasted in the making of arms and weapons will be utilized in human welfare which is required by all living creatures of our world & then only perhaps the creatures of the world & the God will be happy. Do not leave it like a dream please put your efforts in making it true in the whole world & bring the true glimpse of “World Peace” which nobody can kill.

How much happy we would be

HOME OF DISEASE

A population of more than five billion are surviving on the earth with some happiness loads of sadness holding a hope of a better life to come. This vastly expanded earth is spread farther miles and miles with different features of creatures. Among these are human beings living & wandering with a bund abundant of pains, just to live a short, life time like 100 are 0 or dies too early. More than half of the population is affected with dangerous disease for which science is inventing every day new solution to fight them, but still the dangerous diseases are raising their head and pushing people towards pain and sorrow and drowning them in their own tears. Half of the world is perturbed with the failing afforts of living happing and dying. With that dream. This face of truth can being seen on the map of whole world. Long ques of patients in about 150 or more countries have numerous people afflicted with dreadful deseases which could not have been imagined by anyone anywhere world wide there are new and latest build hospitals with advanced technologies still there are afflicted ones fighting back to live life with a ray of hope. That somewhere an other there must be a medicine for their perturbation, which will remove the ugliness of their life, and they will get rid off these dreadful deseases. World wide highly experienced and qualified doctors are busy researching for new medicines and vaccinations to were these afflicted people and provide them a pain free breath. Labs and research centres are busy researching new solutions. Lakhs of infants die during their birth only. And lakh are not able to swing with joy in their childhood, longing for food, sip of milk under the roof of illiteracy wjtb poverty forced then to survived fight for their.

According to the statistics of the world a large number of these type of children are found at Africa and Asia continents. People were dying due to malaria are in a large scale. In the past few years diabetes has touched all corners of world. In every second or third house we've got diabetic patients, which has no medicines in the whole world. According to the stastis of hospitals apart from these there are many emergency cases coming in a large number and most of these are accidental cases. There are victims of road accident, railway accident, fire victing, flood victims, heavy rain afflicted victims, victims of excess of heat, excess of cold, or victims, victims of excess of heat, excess of cold, or victims, of natural calamities, various types of victims all perturbed with pain and problem. This is the scenario of afflicted and crying people of our world. And this is a truth known to all countries. And all give them a hope in living life because of it being a human right. But the truth is a lot different from this. The Governments of all countries has been snatching from

World should not be disabled

their people money or we can say that instead of providing them happiness and convenience they are increasing their pain & trouble. Because every year all the governments make a big budget for this purpose. Due to which common man is facing many dreadful results & these people are not been provided the rights of living, children are losing their childhood forcibly to bear the entire pain given. All these is kept unseen by the governments & they are busy blindly making explosion materials and bombs with the half of other countries.

So much of money is wasted on these non-useful things which is not at all required by common people or their country. Every human being small or big, afflicted with some on the other things are sitting with a hope of getting better depending on their government. On the hand we are on a race of giving then relief from the diseases & the other wide snatching food from their mouth forcing them to cry. This is the screaming truth of our world. Although there is no danger from any country to any another country. Leaving small stray occurrences. Because only those countries are ready to attack who have got plenty of arms & weapons, or those who want to terrify others & wants to use its power negatively. All countries should free themselves with these troubles & change the world to a good place. Should shower love and unity like a dream come true. I pray for all of us, to get rid off all these diseases & may be world get justice by our help. But still we're trapped in the net of loalishness & selfishness building a pillar of selfish.

What justice is this against human being? What kind of greatness is this? If we are thinking about world peace then all the countries need move forward only for a human welfare and focus on human protection. We need to fight

against the diseases, wars, poverty, unemployment etc. This will be the biggest justice on the stage of earth. Only due to it human – beings can get true love. When countries won't have burdens like poverty unemployment, diseases or the power to fight these back, we can hoist the flag of world peace definitely. Leaving negativity behind holding positively through the medium of peace education life will sail like a free boat on a clean & clear earth. All the solution to all the problems should be discussed through this only So that, we may success in saving our load & justifying human-beings. And this justification will be fruitful with all animals, birds, natural climate and balance between them.

*“A small step towards
peace is a big
step towards world
peace”*

*“Peace is not an option
but a necessity of
the World”*

PEACE JOURNEY

Sitting back at home I was trying to kill time and was unable to do so. I was resells due to two unsuccessful operation & not only that after I had great fall suddenly which broke my bone the one which joins both the legs & again the only way out was an operation. The doctor had to used three small rods to help my hone joint & the ration did not success. Again I had to undergo another operation just to improve the earlier but again the same happened. This time doctors did not tell me anything about the result & kept me there for two months and then discharged me with a lie that the pain will take time to go off. This that time our can comfort yourself with the help of a wheel chair. With this situation a become a victim of the disease named Badsol due to being admitted in the hospital for such a long time. Now this disease took three months to cure a nights due to not having sleep and shortage of more worsened the situation. This is about the year 1997. Then my heart said about world peace, which. I used to imagine in my childhood. To spread this forward I started writing poems in region my thoughts of world peace being inside four walls. And took the help of posts by sending this message to people sitting at home for along from me. Slowly & steadily I started getting praising letters and my confidence started boosting. My condition also started improving with time. Mostly after my 3rd operation in which those 3 rods were removed out. Although I had to still use a wheel-chair, but I started finding help for myself & later on helped in my house holds also. Although I was helped by many people and even today I am being helped by people and the result is that I have crossed a long distance on spreading world peace. By this time I was buy all the time thinking on and about world peace. This is been like a great time for me. If you do not loose faith and keep leading without caring about other the success meets you on the way. Same thing happened to me. Time kept chang-

ing and mind kept bringing new thoughts for the peace path. I started requesting teachers & professors to give them and students the lesson of peace. I went to the for most places also. My organization named world wide peace organization a unit of Sagar Parihaar is registered with Delhi government. Was founded at the year 2000. this was a formality which I had to do because being a servant of government I had to face many types of difficulties. Although I got many people connected to me through this organization who helped me call the way to proceed further. But due to the shortage of money these people could not proceed further with me. And because this is the aim of my life and it had brought peace in my life well and I was feeling much better than earlier. So in spite of being interrupted with so many problems, shortage of money etc. I did not lose hope I kept this aim alive and working on it. I took loan from the bank & spent lakhs on the welfare of this good message & to send it to for places also. Mostly I have given this message among numerous students, in and out of our country as will. Students and teachers also have co-operated with me heart & soul. Because I teach them lessons which fills anxiety in life. It help in building up a good future & a good human being in a simple straight way.

This education brings entertainment and some thing new in them & all of the student have promised me that they will give others the message of truth and happiness in their society, country and their part of world. They will protect the planet, earth & keep its charm alive & protect humanism & human beings. So that we can make a beautiful land which has no arms, weapons, no wars and battles. And this is possible with world peace. To keep this aim proceeding slowly and steadily I started connecting with not only the schools of Delhi, infact the society also. In this way fortunately I got the chance to got outside Delhi also. In this way I kept going on caring the flag of welfare I did not lose hope & did not let

these difficulties affect me. Without any fear & with the help of others I am able to open new doors in the world for world peace. Sometimes by rail sometimes by air I kept traveling and earning experience and succeeded in completing a long distance towards my destination and shortening it to reach. Because those people of society who wanted world peace started matching steps with me. Mainly student and teachers started helping, me all of them the ones from primary school, high school even colleges gave a huge round of applaude to bring in world peace & to spread it in their life entirely co operated with me. The biggest thing was that people from all classes agreed for world peace and started co-operating by filling the Performa and kept adding their name in the list of the messenger of world peace. This was an effort to encourage world peace because its like an earth which can be completed together. They only we will be to build paths of virtue. In this way we can bring a revolution of world peace. In all schools and colleges students promise us that they will bring healthy changes in their life as well as they will protect their

Low intensity of population ever provide much happiness.

society & country and be a good student & a good citizen which is possible only by taking the path of peace. We always take a promise from everyone that we will join world peace with grading it as our international language & bring new changes. This new change will change entire human mentality & force everyone to discuss on this new direction. So the grade of international language should be given to “peace language in a form of present & be encouraged to celebrate it on 1st of Jan every year and this day should be declared as a world peace occasion, so that all countries may celebrate 1st Jan happily, to welcome the new year and be increased by more joy & happiness. This international language “Peace” may bring revolution at our country and others. The changes of months in climate brings beauty to our earth and helps us to forget the problems & pain of our lives, developing goodness inside us. This language won’t have its own script. Because there are various languages at various places so at all those we will respect their language and transform the language of peace to that. Because every creature of world is on the way to find peace. Getting tired from the pains of life they want to have a ride of joy. This language will make people strong & sober enough and will give these people decision for new life. Because a revolution of thoughts can bring welfare to all countries. I believe so & would like the world to help me my dream come true in a manner of their duty. This aim has been accepted by lakhs of children of our country & abroad. So why not we request United Nations to complete this aim by declaring 1st Jan as a day of world peace also, or do provide some other day as an international peace day & declare international peace as an international language. We’ve got the help to move on our efforts from many states of India like, Kashmir, Assam, Gujarat, Rajasthan, Haryana, Uttar Pradesh, Bihar, West Bengal, Orissa, Andhra Pradesh, Madhya Pradesh, Maharashtra, Goa, Mizoram, Nagaland etc.

Whenever I have kept my proposal in front of student of these states, everyone accepted it and promised firmly to encourage it. I had an opportunity of going to education centre of teachers also & was able to keep my ideology in front of them many a time. These small proofs together will be the bound of world peace which can't be united by anyone. Come lets enhance the beauty of it. So that the whole world may start thinking on & about 'world peace' as this is the only armour which can save the world from each problem & till humans with joy. Peace will generate ways to join countries among each other which will directly help people in protecting them. Save us from the war ahead and stronger unity. I recently gave this message to the students and teachers of seven school of Ratlan in Madhya Pradesh during my tour so why do we not keep this truth alive and leave the lie behind. Light the candles of world peace everywhere & finish illiteracy. Its our duty & I thoroughly believe in this that we all shout join this journey & race towards a new future. Where peace has been declared. All the goodness of world may unite & come together on a source of it on a same stage to climb the ladder of success with peace.

- WORLD PEACE LIVE LONG!

THE PILLAR OF WORLD PEACE

Everywhere we can see the wind of stir. Its same like the rain drops falling & spreading in to water, humans are also busy parling away with the drama of world & their problems. But its necessary to unit them so that the distance countries of world may be lied in a string of unity talking about peace & unity. Human progress needs them to walk with a same ideology. How much time more will be wasted on learning the truth of life. How time will we take in enhancing the beauty of nature. Situation are getting opposite to us. This air is whispering in our ears the message of world peace, to be seen a loud, to save the earth, human and to give them a safe, secure & new life with its help Ambassadors of all countries may gather & unitedly forces on people and unity & make it loud so that people may listen it & get their plant of life grow with beauty & affection. And may the plant of love & affection grow, may jealousy & enmity vanish for even & world peace may be propagated in all parts of our country. May the darkness in everyone's life turn to rays of hope of a pain free world. To provide strong ness to these we all need to build a pillar of world peace in our countries. And give it a true from. This pillar may have many types of rooms. The children may be called upon from world wide & be promised special education & not only this we need to join teachers & parents also in this chain. So that the incense of the garland of life may provide happiness to all. To full fill this aim we need all those senior officers and leader of the world to be a part in this peace pillar & everyone there may be a part of the assembly prayer held for world peace. There will be a solution soughed for all types of problems and troubles. This pillar will invite everyone just like a temple of world peace which will help

people to come over this pain. There people will be not only entertained, infect, taught the lessons to remove their sorrows & will be encouraged & taught to move forward in life. And to bundle up the happiness of life & keep smiling in life. On this way while waling we will be able to enjoy the incense of all flowers of world. And we can notice peace flags waving everyone. This pillar will help us completely to build up love, unity, sympathy in world. Which can be called the ministry of world peace. Because until we come with a revolution of good thoughts how will peace regulation be brought. Only aware-ness can change hatred to love inside a human. This will be able to end the danger a terrorism also. Because negativity ends up bringing in positively. This positively will make the base of our dream come true of victory on fighting our problems, being honesty and bringing world peace.

LAUGHING & PLAYING WORLD

East, west, north and south the world spread in all direction lighting day & nights rising sun and hiding moon all these plays are seen from decades & will carry on the many other decades. The planet earth has braced all its various creatures of various faces. Colour & structures living on, it. The beautiful planet, the earth has kept giving everyone all their needs of life. No part of earth is useless or hurt anybody. In this procedure is being provided justice with humans as well. Its like, when a birth takes place of a human or an animal bird anything, their mother feels proud starts caring & nursing them to grow safe. Mother sacrifices herself for the sake of her child. In the same way the earth feels proud of its creatures & is always eager to sacrifice herself in this procedure & feels all living creatures are its children of various types. The earth has only a small hope from its human creatures that is they may be real human-beings with humanism & may be able to take care of not only their selves as well as their social & country also. The moon shines different on different days. Its such an amazing game of sun and moon which are so far from us but still take full care of earth. Darker nights are twinkled with twinkling stars & this is a message for people to be happy in their tough times. Because humans get life only once and if you spread it crying on the moments of pain & sorrow then this is not fair. It's like a sin. Because human beings should distribute their happiness & love instead of being narrow and negative. This why we are loaded with pain & sorrow. Then why are we ding to live a non existing life, in aware from the truth. Do these moments not snatch our smiles & happiness left in life? Life is given not only for our own selves in fact for the welfare of others also. And this ideology is known as love and is accepted by the world also. Until & unless we unfold ourselves with other we wont be able to enjoy the true lust of life & provide others the same courage

& succeed we can fill our selves with the ideology of world peace in this way for ever & ever, can run towards all directions with a new thought, new colour.

This will bring changes all over the world including our family. Only we need to be firm in our ideology, to contribute our life on the same thought & deed. I've been lucky to get many opportunities from many years to share the benefits & qualities of world peace with many students. Till date including my journeys abroad I've been lucky to meet more than lakhs of students. Many of famous & big people & propagated peace education among them & been able to solve my ideology with them. All of these have assured me of spreading world peace by themselves & promised me of saving the earth to their bit & make the wall of world peace stronger so that nobody may be able to shake it. This only will be our honesty & true duty of life. These students have me that they will save earth by washing off its ugliness so that our earth may be free of arms and weapons. No third war will be there. Only love unity & happiness everywhere. This is the most beautiful dream of them, who have been able to understand of the ideology of world peace. Students parents, society, small, big, rich poor, everyone even the passengers who have met me & got my point. Its clear that life human & earth can get justice through it only against all problem & troubles of them like an armor. Happiness of life reside between the walls of world peace, we used to bring them to our lives. Countries near of for can bound up only through world peace a strong & long desire way for unity & love for the whole world. Even if this path ma be filled with difficulties. Being weays under the seven, or on earth. This our duty to find this way for a bundle of happiness to provide each problem and person a drop of it to re assure their pain. A hope of new life on the name of god. Like the smile of a child which removes all signs of pain from the on lookers for a while.

World peace would also do the same thing to the on-lookers of it by imagining it. Being a human & keeping humanity alive can bring justice to one & all. And this victory will bring a smile on every face & through this we will be able to overcome all our problems & bring in the colours of happiness as a victory of world peace & bring a relief to all whether it's Africa a land of many problems or South Asia is a victim of poverty. A wave of happiness will refresh them under the roof of world peace cent percent. It's an effort to turn their dream true hopefully in a form of world peace.

WORLD PEACE REVOLUTION

The first world war from 1914 to 1918 wrought the word and destruction on the map of the world. Lakhs of lives were thrown in the will of fire, lakhs were homeless, perturbed to rebuilt their shelters. Thousands of people injured and their families in an effort to bring in happiness, and live assured that no more wars would take place. But infact there were quarrels and fights in all coroners of the world for their rights. Some were fighting for freedom same cannoning for possession on other. Means if u see deeply only difference were raising. The entire atmosphere was full of sparks of evil, an un-calm world. The sky had the thunder of the hatred in the heart of people on earth. There was no happiness in life. Lakhs of crying and screaming children un-aware of everything, & their rights of happiness was snatched by the world all over the world in all those countries who were battling among themselves. If anybody could question them for whose right were they battling for? For which type of happiness? I don't think tere could be any answer with anyone, except only to hide their own defects and faults & to input them on other. To increase the area of their countries strong countries were chasing others countries strong countries were chasing other with the help of their forces and weapons.

War was on a speeded race on small breakers & those countries also were victimized who didn't want to war. Forces were against each others, people were craving for food, clothes & shelter. Injured people were multiplying their numbers by each gove day & night. Sun & moon are the witness of all those numbers of killing people troubled by the foolishness on the humans. Who were not able to save themselves & their beautiful earth & humanity instead digging the wells of insanity. Oh! My God! What a human-being. Alas! The almighty

God had not given them the power of vision & world have left them as an animal only. So that I couldn't be guilty to see them.

Now it ad been only few years to the first world war gone & again due the jealousy again the clouds of war started shadowing the world especially in Europe & it was left that the second war is racing towards us. And in sep 1939 second world war was started, human beings had hardly forgot the first one the second one came terrifying along politics. Germany attacked Poland, the whole world had divided to two groups & battles started speeding up & killing became a fascination routine. Life & humanity was finished & chain of smoke near shattered on the map of world. To take possession on weak countries & them to celebrate it was the routines of strong countries. In between this the number of people dieng kept increasing. All were dieng to save their lives. Anyhow the war may stop. Oh! God please give them senses, to not fight and stop bloody battles. Show them the way of living life & know the justice to it be done. In between this 1945 or 6th and 9th August two main cities of Japan, Nagasaki and Hiroshima were attached and exploded with atom bombs by America. This was the most dreadful attack with poisonous smoke & gas which destroyed thousands of miles in few moments.

Lakhs of the people were injured & left in that situation on die & cry. Who are still shedding tears. This situation & condition and the thunder of explosion shook the world & everyone dropped their arms down. Just to be saved from this type of explosion. Japan also became calm after this who was steadily chasing last Asia. This second world oar which lasted till 1945 kept its story & truth is front of the world. That war brings only destruction in the world. A blooming world is

possible to bloom only with out wars. No war Never was is the only pact on which future depends. Nobody may again do any mistake due to which the third world war may take place, to hurt us. Because the rapidly growing world has got so many of arms & weapons, that even by mistake those are used it will kick the entire world into the well of destruction. Means the human beings as well as birds & animals, insects, trees plants will come an end. No one will be spared, to see what happened after war? All these truths are been ignored by all government are playing because all of them know the result. Then for whom are we living and what peace of world are talking warning a mask of foolishness wondering in the lawn of lie, with the flag of world peace Rapidly growing negative thoughts, spreaded, poverty, unemployment, desease. What good education do we talk about? When we don't follow the path of peace. Come lets discuss seriously to save he planet earth and give happiness to human beings. Although we've already changed our thoughts comparing to the life of earlier ones. But still we do not restrict ourselves from walking on the negative paths. This negative thinking has given birth to terrorism, which perhaps would be the reason for the third world war, or due to the shortage of water all of our countries need to know their weakness and their truths. Due to which the shelter of peace goes for away from us. We need to accept these truths like an unbreakable wall & give living beings the happiness to live. This is ealling all countries & requesting them to listen to his voice, have mercy on crying writhening people & their families.

Proceed World Peace by the source of education. Until & unless we do not face the truth of life and have the grace of God. We will be an incomplete Human being, killing & attacking everyone and making them also to learn the same.

World peace will teach us to find the way to happiness. World Peace is that treasure of nature which knows to give happiness and believes in justifying everyone. It keeps justice with nature also then whether its an animal or an insect. The happiness we feel when a flower blooms and becomes happy by blooming the same happiness can be felt by adopting world peace. If we turn the pages of history, we find there have been revolutionary changes without bloody battle. Same like that we need to be confident and bring the revolution of peace in the whole world. So that the voice of peace may be heard by people. And we may compel people to walk on this path. This is the only path, which takes us towards humanity & its welfare. Life's cycle is made to walk on the path of happiness, the moment we take the wrong path we cheat ourselves and our country also. And we are playing a false game on a ground of lies, with a duplicate smile entertaining ourselves. Though peace is login only for two wards from us. Which is been gifted by the nature to us. After education on also if we do not be a good human then what education is this? Walking on the way of peace only will help us to be able to bring world peace where people will show their humanity, kind heartedness and welfare for each other. This only is the path of peace & only with its help we bring the revolution of peace in the world & bringing in this beautiful face of world we would be able to justify each other it is the necessity of today's life. Human beings are sitting in all corners with a dream that like the darkness of night vanishing with the rising & shining sun the light of peace will get us rid off the shadow of unpeacefulness. Whether truth may be hid by many lies, still the truth is truth. Like this only peace is peace and any unpeaceful thing cannot change the path of peace. Its immortal, in the entire solar system & earth. Then who can put a veil of lie on the

face of world peace? We surely hope for that. The path of peace is built with marbles who are famous to spread this light & smoothness to distance places. Then unpeacefulness climate and unpeaceful people cannot fear it Victory is Victory. The victory of truth is the loose of lie. World peace is a truth & we need to spread it right from our families to societies, country & world, as all will help in making for helpful & successful journey for world peace.

Today also there are many people waiting for their rights in all small countries, homeless people thrown out of their countries are being hoped to get back this shelter. So many countries are caught in flames of fire & the people there hope to get a happy life's right like:- Iraq, Afghanistan, Philipins, Tibbet is possiessed by China fighting for freedom since 1959. Many quarrels are going an inside Pakistan also for their rights and almost all these countries are full of exploded and played like games. For which right, to justify whom? Which country is positioning which country & why? What right do they want from the earth? Small discussions turn to quarrels and this is seen in all countries. We should think that which country has pressurized which country and for what? There wont be proper answer given for this question. Everyone know and they deny the fact of world peace. And that this is the only way to progress.

Poor countries have got people longing for food, dieng to feed their hunger. Means they are longing for their rights on this earth. Its against world peace, we've snatching their rights & happiness forcing them to cr. Peace has been very necessary now & should be embraced by the whole world. This victory will whom the path to human welfare and with its help humans provide happiness to each others. This is the only right & good answer to all the problems of world, be-

cause this is the only pace from here the way of progress starts. And to keep naturalism alive we need to sow the needs of peace, in all countries and corners for all citizen to get the right of humanity, life, happiness, work, to be embrace to have a sweet home, to spread peace, to have education etc. These all rights can be full filled in with the shelter of world peace. And these single small steps moving will give world peace the face of a revolution. Means the earth will have the air filled with joy & life. Which will make everyone happy. And for this we need to start it right here and right now, Initially by the medium of students, on a large scale & include parents family, officers, leaders etc. So that all these people may unit-edly be able to give this revolution a true meaning. And at least we may be able to stop the gathering of atomic weapons and arms. And at an cost the third world war may never take place in this world filled with dangerous effects. Even that nobody may be able to use it for their own self sake, or any other country. Like nonce raised by North Korea against South Korea. Or even by mistake Iran or any other country like it may not have an atom bombs. To have peace in our life we need to move in time with our rights & we need to respect the flag of peace which is the identy of truth. This revolution will be able to bring the treasure of victory for all.

DISCOVERING A NEW WORLD

Every human-beings proceeds his steps in life according to their ideology & keeps on moving in spite the disturbances of the society still they think of something new & better to live & keeps trying that, Perhaps he will find a new way to make life more better. So that in the streets of life he can find the new facts and new hopes of life, & he is always busy in it. So that he could find something to make his life successful & find lots of happiness. This is a lust of everyone's life for a better future. Everyone where there are scrams & nets of troubles. Lots of people loose their lives under the burdern of life can we save them from poverty? Or can we protect them with a blanket of wealth, or can we get it with the bundle of all necessities. No never not at all. If it would be possible then people of rich countries would have been started finding peace. Those people who eat good, dress up good, get good education etc are also still, why not so happy with life? Why are they sad? They shap in costliest market of world still unhappy. After all why If one could be healthy & possibility find peace then today most of the population on earth would have not been finding peace. All those people who bring differences in the society due to which always the society is up & done, due to which humanity is killed and terrorism raises all those people are happy doing all these. Buts its not the true happiness. They are always restless inside their hearts due to insanity done by them. Because these people always snatch food from others & fill their stomach. They want to gated happiness by giving other pain. Then how is true happiness in life possible. All countries have been troubled with people who are killing others for money. Man has been selfish. Don't know what destination are they looking for in life & happiness does he want to gather to remove is restlessness, of lie. It's not a question of a single person the entire human species is facing it. In all corners the air is against

humanity and the path of truth has its flag running on it. This flag is the true happiness, which is not clearly understood by people. Because this truth is the great world peace which cannot be spoiled by anyone or thing. Although objection can be there to spoil this way by humans & devil as well. But the air of peace is flowing & will flow smoothly, singing to people to know it & embrace it for safety & good future. Peace will show each & every country of the earth new ways for develop & happiness. Peace is whispering its magic in everyone's ears the only thing is to be recognized & adopted by people. The light of peace has got the happiness of life's each moment. By the grace of god, we should adopt it & keep unity strong. This is the biggest treasure of life for human & the world is busy trying to find this treasure so that human beings may be pleasures like a garden filled with greenery of life for other on all the corners of world can after getting this message of happiness all creatures may be happy and be grateful to human brings. A beautiful world which can impress the sun & the moon also Happy Dreams in the lap of humans, swinging peace, filled air in the new home of all.

Really how amazing it would be peace on land which was full of a restless planet, full of hatred, violence pain, cry, weak-poor, homeless & helpless people, crying sky & weeping oceans. The entire nature losing its identity. This fearful stir an earth has snatched every & the right of many children and forced them to cry. With our wrong ideology we've helped the fire of unpeacefulness to spread. Due to this the climate on earth has taken negative directions towards all corners and its rapid speed has taken many lives away. And this negative race of arms & weapons has not yet stopped, & the result are the commodities, seen in the maximum countries of Africa continent, South America & North America as well. It kills silently & breaks unity with bringing natural differences as well. As it is noticed in Asia continent. Arms & weapons are continuously manufactured to be the one who got the most of

them to threaten neighbor countries & if wanted they may use these to destroy them. Human has no humanity and unpeacefulness is creating insanity to its peak having a face of man & heart mind of devil, the dangerous terrorist of this earth. We need to convenience them with the weapons of peace & control the entire insanity spread in the world. There are few lines of a poem I remember.

*Oh Man! What have you don?
Oh Man! Why have you done?
For whom did you do that?
For who's sake did you do that?
To kill whom did you do that?
Whatever you did,
Peace never dies.....
Then whom did you want to kill?
Were running the charm of earth
But unable to do that.
At last you will have to kneel
And sing the song of peace
This is your & my dream
Then why are you angry
Away unaware of truth
Lie does not has legs
Come Come Come on
With the help of world peace
U & me both will have victory
Towards humanity
The dream we dreamed earlier
The same dream will be the last one
Come Come on Come, with the help
of World Peace.*

What type of justice allows us to snatch the smile of smiling children, the shelter of people to ignore the disabled one, to break their walking sticks, to bring destruction instead of progress. What education teaches us to do this? Life is to live peacefully. One should always help others and never hurt others in life & live for the goodness and happiness of others. This is the summary of life And we've been taught this and to dance and enjoy the melodious music of life. Life is like a boon granted to us by God to be happy, breath for him & help others making life more beautiful & keep unity among us & clear our difference. Loving & enjoying it we may understand life. This is the knowledge everyone needs to have. It should be told and taught to children right from the childhood through education. So that we can save our future, ourselves. We will succeed in this way to spread the ideology of world peace to all parts of the world, & it will seem like a huge thick forest which sends a message of its unity & beauty & helps to purify the entire, climate & save all living creatures in and around it. We need to encourage forestation also & help them in growing & blooming. This is a message of peace which will be able to remove many problems of life with the help of peace. There are many examples in the world where people had nothing but were more than enough satisfied because they had peace, knowledge of peace education which helped them in helping the needy ones & supporting them to save them. The world keeps going on morning after evening keeps spreading the splendor of beauty of it. This amazing knowledge of peace is raining on us giving a message of peace, & with this we can receive the grace of God & people. These people grow to be great people & people start following them. To have the pleasure of their words on peace & human protection. Like Jesus who sent down by God on the earth to

help people in living life without having pain in life. But it couldn't be possible because the devil hanged Jesus on Cross and insanity won on humanity. Jesus gave his life for human welfare and for give all the those for the insanity they did & showed them the way of victory of humanity on insanity. Good winning on bad Mahatma Gandhi adopted these facts from the holy bible & Jesus Christ & forced people to adopt truth & non-violence in their lives. And helped our big country India to regain its freedom with the help of peace. Mother Teresa also lived up for human being. She taught the lesson of humanity & welfare & told us that this is the only way to save, protect & help one-self, others and countries. Peace is the immortal truth on which many people walked & worked to be called and known as the great leaders like Mahatma Budha, who has been followed by main countries like their own leader and saint. Because he was the one who left the luxurious of life & went to a quiet place, sat under a shady tree & deeply thought on human welfare & safety & then spread his beautiful ideology to people & place as far as possible. And with this he became the lord of east and western countries of Asia. There are many more example like this in the world with many great leaders like this. And world peace was expected by all of these. So that as more as possible people may be able to walk on the path of world peace & be adopted by the world. This is the most important thing needed by us. Today this is the only beautiful nest house of human on earth. Which can help us in living happily & succeed in life. This will also bring major changes & turn the earth to immortal. You have to be praised for the welfare of world, May they understand or not. You need to make them understand again make new paths and keep going on the world keep going.

A NEW SUN OF PEACE

The setting sun from Japan to farther western parts sets down worried and sad everyday with many incidents against humanism. Hoping to provide those particular parts a new ray of hope where the darkness of insanity has capture everything. The moon also rises with new hopes that perhaps in the moonlight reflected by me may the revolution of peace spread all over & bring new major changes in the favour of human beings, with the victory of positive ideology & a world of success. These rays of love & kindness will spread new light for people living on earth & bring in new fruits & flowers, crops in farms. Whole world is being tried to be took care, so that death which is a universal punishment may lead us to new life, where life will be immortal the walls of sorrow will be brooked and happiness walls will be built. Because it is the second name of that powerful strength which as given us the happiness of life & the charm of earth. And if we are not living with these blessings or are avoiding them our life is vain and a kind of stupidity. Everyone on this land comes empty handed & leaves the land again empty handed. No one carries anything on both the times while coming & wile going. The one who leaves lived his life seen sadness and happiness leaving everything & everyone behind. Then for whom was your birth on this beautiful earth? As the most beautiful creature human being which is not easily got. And if we walk for the welfare of earth, spread up for the welfare only, help others, sing the song of love, means if we sacrifice our life for the sake of humanity & welfare & growth of people, spread happiness among each other then only they become immortals even after life. Keeping this fact of life in mind

everyone may live to save the earth, people and for the welfare of other. This is the fundamental base of life. If you have lived only for yourself, then what did you live? Oh! My heart you beat for others.

This truth is the truth of peace for everyone's life because truth rises everyday like the sun & the moon. The lie is like darkness spreading uncalmenss in the world. It snatches our qualities & fills us with de-merits. When we will ourselves with the water & food of our demerits. When ti will start all the evilities functioning, war battles killing etc, which hunt innocent creatures & then the of insanity starts with differences, dividends, terrorists like serious infection in all the corners of world. Again the stir rises of insanity, with its destructive waves. This is the present era seen today in all great continents. This unclamful climate has trapped many peace & forced them to have troubles & pain in their life longing for peace to rest under its shadow for a while, to bring in the truth of life Whether its the bank of a river or an oceans speedy wave, we can be saved from by only and only the help of world peace. And we need to bring everybody under its roof and be called the world winner. The new sun may rise with all needs of life, killing the evil & bringing in the good. This is the only desire of world peace for people on earth, to save our life & world & which sends only good messages, replaces the darkness of life with light. Why do we not adopt the qualities of peace? Why do we not spread peace moments like the beauty felt by seeing a beautiful flower same is felt by peace.

WORLD TURNING RICH

There is a world of happiness hidden on the earth planet having all type of thing inside it. Digging soil creates a well and well gives us cool water, greenery to farms is seen only after ploughing the upper surface & sowing seeds. Every country has got planets, forests, greenery, ueggies, fruits, flowers according to their climate. It means that there are any tasty foods for humans here so that people may not worry for food & this creature in the face of human being may grow well. Because they are sent here to travel on the planet with Gods grace. Due to which we have took birth on this planet earth & kept succeeding in between troubles as well. Due to it only humans are able to get this gift in each & every bit of life. So that he may be like a happy traveler of his life & go back to the place he had come from. The more we find out the more we find something or the other treasures of life whether its in the form of water, gold silver, diamonds, jewels, coal, oil, petrol oa in the medium of gases. We've been able to grow rich with these treasures & help in living life to human beings. And all these natural treasures turn humans beings to be the richest on earth. Means now they can throw off poverty & cover themselves with the blanket of richness.

If we count these natural treasures in rupees or dollars then it becomes a lie because all the things created by the almighty like air, water or treasures beneath the earth, rain b on sky, rapidly growing fruits & flower on trees and plants, fast flying birds & racing animals all these amazing tings are his creation and got by his grace only. The earth charm lies in it, & due to this we are able to anyhow complete our journey

of life. We leave or ignore peace which belongs to the whole world to be trapped between sorrow & troubles. Because we are leaving the natural truth and are behind lies embracing them which is baseless & the path of lie or it can be said that we have internationally and knowingly put that curtain of lie on ourselves for our own sake. Due to this we've started loving lies & believe in man made things instead. We can see the highs and lows and mutual difference due to it in this world. Means people for its self and sake are behind the currencies or money known by different names in different countries made by their own self & think about themselves being rich with having it. But this is the main reason today of unpeacefulness. Man with a long life is not a treasure, infact giving his life to provide happiness to others, with human qualities and sharing the pain of others & walking on the natural way of truth is a treasure of human species. Due to which we've formed & coloured to proceed ahead and sing the song of truth which beings in peace. If we keep going on this path then only human life is called successful. The treasure of world peace is spreaded on this way of truth for which the entire world is searching for.

NO WAR NEVER WAR

THE RISE OF WORLD PEACE

We have the power to make a crying child laugh & find a way to success in spoiling situations also through peace for development sources. Like when the fire is extinguished there is smoke coming out, same like that when we try to stop non social activities there is a smoke of unpeacefullness. Just give a thought & imagine those moments of history of our country in riots & quarrels, bloody battles & those moments where happiness was snatched from people & tears were given due to which the entire country was terrified anarchy was spread in our country. Because the whole world was going through the same situation & there was not even a single place left by wild storms seen. Natural calamities raised their heads & destroyed as much as possible. And the most part of destruction was due to the lackness of world peace the world's history is its witness. These stirs against human life not only brought these type of natural losses, infact, our life became a hose of many dreadful deseases as well due to it million people, children & oldagd became the victim of it. Just for two moments of true happiness in life there is war going on between life & death & on an account of this, daily needs of life become too high to survive. Due to not having food, clothes, shelter & work the war is still on. To remove this toughness there are many solution carried on and we are succeeding too. Still human tear is not stopping. There are screams & cries heard from all corners of the world, to get the right of living for at least two moments. This is the only hope of a perturbed human. With the help of the few moments of peace he may walk proudly holding the flag of freedom & a strong paths of world peace. Because this is the only simple solution which will help us to not only remove poverty and deficiencies from our life, but be successful for ever. Because its a very good quality of adopting world peace in lives. It teaches

us to live at any case any situation. It awakes patience in us and helps in fighting in all troubles without hurting anybody. Singing the song of goodness, admiring the sun, the moon & helping us to maintain natures charm. The name of true happiness of life is peace. Without it even a rich man is a poor. Its an education which if is not taken then its on the grade of illiterate. It is will not lie with us then the entire life cycle of all living creatures will come to a danger. This is most beautiful soil of world which terrifies all kind of evils and its the bestest friend of goodness. This is the tallest & prettiest pillar of the world which can be seen and end mired from all corners of the world & it fears to terrorists by going them near to it. Come lets break all those chains which have put human life in a danger without any reason an lets give all our enemies the message of world peace & make them happy as well as & is completed to think on the subject of world peace. Because those countries are also in a serious need of it & it brings all type of developments too. This is only the eandle which shows the way to lost people, show ever happiness & removes sadness. An all over development which will make the earth planet alive, full of greenery & blooming just like a heaven on the earth. By only the sound of its coming foot steps there is a smile on humans face & evils running away by a clap given for it. World peace is waiting with open arms to embrace all people of this world.

Do we have that humanity still remaining inside us that we may also welcome it with open arms & bury all the evil inside ourselves & let humanity & peace spread all over the world & live there for ever.

Without it we all are homeless, helpless, workless, illiterate and poor.

- WORLD PEACE LIVE LONG

PROMISE / COMMITMENT

In our life we make many promises & full fill some and ignore some. But this promise is a commitment related to each & every place & person of our earth. Its such a promise, such a commitment which we all have to full fill at any cost, for our self for our protection, for the unity of our country, to make the world more beautiful, to embrace truth travel we need to adopt truth. Because this is the natural truth by the grace of God, and there is no other true path to wolf for welfare of the world. On this path only those travelers meet in the light of truth who had lost in darkness finding the new way for life. Only world peace can serve all over the world in its welfare. We can feel the true commitment related to our life and this is the only truth of world which will bring us the bundle of happiness when we adopt it. Its the support we can be through for others, which needs to be fulfilled by each country at any cost, and wave the flag of peace in all of the corners of our country, so that we may fulfill our promise and be committed to it.

Come lets lite the candle of new hopes for future, and never ever let it blown out. With this promise. I also promise that through this book of mine whatever I earn I will spend it on the publicity & propaganda of world peace, & request all readiness to kill the enemy of world peace & stronger world peace by this bit of contribution to the following address, by post or through emails.

Lost and found much in life
Let's go and not loose anything else
All of us may take a same path
Unitedly we proceed with the outfits
of Peace let's move on and on.

- HAIL WORLD PEACE!

Work Done by Me on Peace Education

(A Summary)

I want to introduce myself to you. Ever since I was 12 years old, I am living the life of a handicapped person. Before that, I used to play, jumping, hopping and skipping, just like any other child of my age. Suddenly, Because of an event in my life, I became a victim of an accident and have been living a life of a physical challenge. On the advice of doctors, I had to stop going to school. In a few years since then, my mental state also began to sag and conditions of my body also began to deteriorate. In view of this, I became helpless for a long time. Even friends and children could not help me to participate with them in their games. Secluded, I began to think within myself that I should go forward and beyond, beyond all my friends and achieve some tangible, some unique success and serve my country. Being unable to get good medical care, I got along with the help of hopeful attitude till 1996. In that year my bones were damaged and I became helpless. Because of broken bones, I have been spending my life on wheelchair, since then, to date. I am compelled to take recourse of somebody's assistance. But the strength of my spirit made me forget my shortcoming and helplessness and goaded me strongly to move ahead and achieve something, for the well being of the whole country as well as whole world. From then on, I loaded on my shoulders, the burden of world peace and moved ahead spreading and instilling peace in the minds of millions of people around me and make them do all possible programs in search of peace. I have achieved success. Even though it is full of challenges and it involves diverse functions, my mind has established a rock on faith and determination in me. I will continue to hold the torch of worldwide peace and I will not stop till I achieve success on the strength and footsteps of positive thinking. This is the firm objective of my spirited life. My efforts will continue to advocate stopping the production of lethal weapons, and to stop wars forever from the face of our planet earth. Lo! when can I witness a situation when our planet earth gets rid of treachery on its soil, when enmity ends,

when does brotherhood sprout and when all the mankind on earth will be able to lead a life of peace and freedom? Efforts towards this goal will continue as long as I continue to live, because this indeed is the truth and this, indeed is life. True success is certain to certain endeavor. Various experiences of my life in this field will unfold themselves in what follows. You can witness various peace attempts in the picture.

Confined to the four walls of my home, main activities like spreading and message of peace through the medium of poems and radiate enlightenment of positive thinking, through new year greetings and a strong will to achieve something tangible, have been the beacon light of all my endeavors. Because people who are physically challenged are viewed, with pity, as helpless beggars and alms-mongers, even if any they come forward to achieve something in life, they are reminded of all their shortcomings, stopping them from moving forward. I was also a victim of such a legacy, because I had already spreading peace purely at my own cost. I got encouraging and positive response through letters from many countries appreciating of my attempts to spread peace. Even now such letters continue to pour in. At last, an organization by name "World Wide Peace Organization" was established under whose canopy, various peace related activities and programmes have continued to take shape with full spread. Because of financial constraints, I had to take loans from banks and spend them towards spreading world peace, in search of a bright future. But my physical and financial conditions deteriorated further. As I could not repay the loans in times, notices from banks and courts continued to threaten me, but due to my firm resolves based on the strong foundation of the path of peace, I got along despite all these difficulties, without being baffled and without becoming panicky and nervous because, we have come across many great person in history who faced similar poverty and fought with them and hoisted the flags of victory based on self-sacrifice, self-confidence and self-motivation. Till today I have visited far and wide in India as well as abroad on the same cherished mission and addressed thousands of thousands students and teachers so that we would have excellent peace related future.

-Sagar Parasri

DISABILITY AND DIFFICULTY

*A few take birth
Destined only to face troubles,
Only to run a race against
Will of the providence
For them life is not a bliss
But a tough challenge
And they have to swim
Against the fast current
Of a deadly river ever and ever.
They are the martyrs of
The natural happiness
Which the mankind is
Bestowed with in general.
They are the ones
Who are not given a way,
But have to make their way.
Their determination and
Their pursuit is so honest
And so strong that
Even the negative will of
The providence proves to be insignificant.
One such super instance is
That of Prof. Hawking.
There is no denial
As disability and difficulty
Are like hands in gloves,
But ardent flame of aspiration and struggle
Takes one to the highest success
Where there is no
Disability and no difficulty.*

**MAURITIUS HIGH COMMISSIONER
NEW DELHI**

28 February 2008

TO WHOM IT MAY CONCERN

I had the pleasure and honour meeting Mr. Sagar Parasri twice, once when he called on me at the Mauritius High Commission, prior to his visit to Mauritius, and the second time during a function hosted by the World Wide Peace Organization. Mr. Parasri deeply impressed me by his determination and the tremendous work that he is doing in the field of World Peace.

Despite his physical handicap and all odds he encounters daily while travelling and attending countless conferences and meeting people to share his dream on world peace, Mr. Parasri is resolute in his determination. There is no doubt, nothing will stop him until he achieves his dream and goal.

Like all great leaders, determination and willingness are the main characteristics of Mr. Parasri. His willingness to confront all difficulties along his way for peace, and investing his time without complaining, are among the remarkable features of his character.

Mr Parasri should be an example for all of us and I strongly believe that he deserves the best award for all his efforts and contribution to achieve world peace.

Dear Sir,

It is indeed, a pleasure to know that Mr. Sagar Parasri, Peace-Researcher cum Founder, Worldwide Peace Organization, 3/34, NIE Campus, NCERT, Sri Aurbindo Marg, New Delhi-110016 has been associating with the work of world peace over many years. Two years back he first time visited our office, State Council for Educational Research and Training, Lucknow for delivering his valuable speech over Peace Education among students, teachers and staff.

Mr. Parasri is physically challenged, but unparallel person of conviction and commitment for Global Peace. He doesn't talk only, but he conveys his concrete peace through his incessant efforts. It is exemplary to note that he spends a good amount of his salary for his programmes related to peace promotion. His book "Discovery of Peace" is a good piece on peace, and it is full of inspiring message of peace. His motto "No War Never War" is aim of U.N.O. and other humanitarian organizations and his latest book "No War Never War" is about to publish soon. Its dummy copy is ready for your reference.

He never feels disheartened with adversaries and he advocates for peace on the planet and nothing else. Mr. Parasri has delivered several lectures in public gatherings, schools and Universities. He organizes conventions at India Gate, New Delhi every year on his own initiatives which is worth attending. His activities deserve national and international recognition seriously.

You are kindly requested to consider him for the prestigious award.

FORWARDING

I LISTEN & I FORGET...
I READ & I REMEMBER
I DO & I UNDERSTAND

The above line by Confucius rightly fine on Sagar Parasri. He is a man of strong will, he has faced the legacy of bureaucracy, harassments, humiliations & many more which only he has felt & faced but he stood high, high on his courage is prove that physical limitations & constraints cannot ever stop the strenght - the inner strenght of peace of humanity. He has proved that for him sky is not the limit.

In his book "NO WAR NEVER WAR" Sagar has tried his level best to take on all the hatred topics, which are like the open wounds on humanity.

He analyses & tries to medicate more correctly vaccinate, These damage, we knowingly or unknowingly, all have done to the environment to the mother nature, he tries to heal the voilence & hatred spread in over minds & souls. He firmly believes all these can be overcome only through one medicine, to leaps a small steps to save the civilization for years to come-PEACE & HUMANITY.

If Sagar who in spite of struggling with 90% locomotors disability can mänge to spread the message of peace, hamony & no war never war cannot be the all who are blessed healthy limbs & healthy lives. help sagar & contribute a bit of over with his to spread his message of humanity at all corners.

Sagar makes us feel the truth of Vasudev katumkam.
Come up Rise on Provide the helping hands.....

Subject: Appreciation and Thanking letter.

Sir,

We are highly thankful to you for sharing your precious notions with us and our students. Certainly your address would help our students to become not only good students but also good human beings. Peace is the first and foremost necessity of today's world and your devotion and dedication for creating a peaceful world is highly appreciable. We all are with you.

Thanking you

*You know, we known,
All around is the nature show,
Smiles are like gifted rainbow,
Peace and unity is everyone's vow*

I appreciate Mr. Sagar Parasri for his continuous efforts in spreading the message of peace all around the world. My association with him and World Wide Peace Organization is many years old and I have enjoyed every bit of working for the cause of world peace. I am proud to be a part of the organization.

Since a long time, our organization was remarkably doing well. We are constantly invited for giving lectures in different places. Masses like students, professors, professionals, social workers, politicians have joined hand with us. I am very happy to see Mr. Sagar excelling day by day. I wish him very best for his upcoming brilliant book on “NO WAR NEVER WAR” and may God give him all success for his noble cause. Lastly, I would like to end by saying:-

“War pollutes the eco-system of the universe, peace make it more beautiful”

(Vaishali Kant)
Advocate
Delhi High Court & Supreme Court

An Appreciation Letter

“One should appreciate the fact that someone somewhere is trying very hard to spread the message of peace and harmony and patience the tolerance”.

I can never forget my visit to Delhi in January 2006. Coincidentally, I met Mr. Sagar Parasri on 25/01/2006 in his office at NCERT, since then I am associated with his Organization. His book “DISCOVERY OF PEACE” was a great inspiration to me. I have participated some program and lecturers on “WORLD WIDE PEACE ORGANIZATION” in Guwahati and Delhi, which motivated me to deliver this message to mankind at my native place Meghalaya (Shillong). Every year our organization celebrate 1st January as “International Peace Celebration Day” at India Gate and 2nd October as “Non-Violence Day” at NCERT. I appreciate having had opportunity to work with this organization by education other about being peaceful and acting in peace with other.

Finally, I would like to thank him for the support, guidance and encouragement he has provided and also wish all the best for his upcoming book “NO WAR NEVER WAR”. May peace and blessing be on all the people in India and around the World and God bless him too.

Dear Mr. Parasri

I was much taken up with your commitment for peace building and the efforts that you are making towards this end as an individual. Your poetry is also very inspiring to this cause.

Your positive thinking and approaches are a great example of a peaceful person, since this is the first characteristic of such an individual.

I have provided you with a copy of UNESCO's Teacher Guide to Peace Education. We need to globalise such concepts in our quest for global peace.

I wish you the very best in all your endeavors.

Yours sincerely,

R.P. Perera
Chief Administration & Programme officer for Culture
